REASON FOR REFUSAL

- 1 The proposal constitutes inappropriate development in the Metropolitan Green Belt for which planning permission should not be granted, save in very special circumstances. In addition to the harm by reason of its inappropriateness, the proposed development would also be detrimental to the open character of the Green Belt in this location and would cause harm to the visual amenity of the area. The applicant has failed to demonstrate that other considerations clearly outweigh that identified harm to the Green Belt and, as such, the proposed development is therefore contrary to Government guidance contained within the National Planning Policy Framework and saved policies GB2A and GB7A of the adopted Local Plan and Alterations.

WAY FORWARD

Members suggested that as the scheme is clearly contrary to national and local Green Belt policy and is not a case where very special circumstances exists. National policy through the NPPF does permit the redevelopment of brownfield sites which do not have a materially greater impact on the Green Belt. Ridge House does not contain any built form which could be used as justification for housing in lieu. Spinney Nursery is only occupied by a small commercial building which would justify potentially one small dwelling of a similar volume in order not to have a materially greater impact and be policy compliant. There would be the added benefit of removing a use which has nuisance potential. A large section of Burleigh Nursery can be classed as brownfield and this site also benefits from an extant permission to redevelop with new commercial units. A number of dilapidated glasshouse structures could also be removed to justify a small housing scheme. The foregoing provides an potential way forward for a much scaled down housing scheme.
