

Supplementary Committee Agenda

**Epping Forest
District Council**

Local Highways Panel Tuesday, 24th November, 2009

Place: Council Chamber, Civic Offices, High Street, Epping

Time: 7.00 pm

Democratic Services: Rebecca Perrin

7.a Report to Local Highway Panel November (Pages 3 - 32)

This page is intentionally left blank

Report to Local Highway Panel Programme 2009/10

Epping Forest District

24 November 2009

**West Essex Area Office
Environment, Sustainability and Highways**

1. Purpose of report

- To provide Members with a report on Highway issues within Epping Forest District.
 - To provide sufficient information on schemes so that decisions on local priorities can be made.
 - Members are invited to offer suggestions and requests for future works.
-

2. Background

This is the third meeting of the Local Highway Panel, Epping Forest District. We are currently mid-way through the financial year and as such we have completed the majority of capital funded highway maintenance schemes. The capital budget for this year is at this stage fully committed.

3. Programme of Works 2009/2010

3.1. Maintenance

The current programme of Highway Maintenance Initiative schemes is shown in **Appendix A**. As you will see there are only a small number of jobs to complete this year.

Members will be pleased to note that the Cabinet Member for Highways and Transportation, Councillor Norman Hume has provisionally approved an additional £4million of Capital finance for highways maintenance for the current financial year. Of that funding, £659,000 is being made available for schemes in the Epping Forest District. As such, the following maintenance schemes shall be incorporated into the programme of works in addition to those already listed in Appendix A and it is anticipated that they will commence on site early in the New Year.

Existing schemes, where additional works shall be funded:

- A113 Romford Road, Ongar (Marsden Ash House to Bridge Farm)
- A121 Waltham Abbey Link Road, Waltham Abbey (Phase 2 works)
- B181 Epping Road, Epping Upland (Junction with Upland Road)
- Waltham Road, Nazeing (Selways to Middle Street)
- Bury Road, Waltham Abbey (Hoebeam Lane to Gilwell Park)

Carriageway resurfacing:

- B1393 High Street, Epping (Grove Lane to Hemnall Street)
- Hastingwood Road, North Weald
- Stewards Green Road, Epping (Bower Hill to M11 Overbridge)
- B183 Harlow Road, Sheering (Back Lane to lay-by)

Footway resurfacing:

- Grange Crescent, Chigwell
- Roundhills, Waltham Abbey

B170 Roding Lane: Officers have been made aware of proposed bridge works here and so to minimise disruption to the area, it is planned to defer this maintenance scheme to the 2010/11 programme to coincide with these works.

Langston Road, Loughton: Due to the unanticipated increase in financial implications of the works to the remote footway at Langston Road, Loughton, it will not be possible to financially support maintenance works to Brooker Road and Hillhouse, Waltham Abbey. Officers will reassess these schemes and look to include these within the 2010/11 programme of works.

3.2. Improvements

3.2.1 Traffic Management Improvements

Current traffic management improvement schemes are shown in **Appendix B**

This budget supports traffic management improvements such as junction improvements, provision of mini roundabouts, zebra crossings and such like.

Nazeing: At the last meeting of the Panel it was reported that speed assessments were being carried out. These have now been completed. Officers have also now received a draft of the routing strategy which, at the present time, they are amending to final detail. Consultation documents have also been submitted to all concerned stakeholders. The signs and speed limit restrictions are still anticipated to be implemented within the 2009/10 budget.

Also under the provision for Traffic Management Improvements is an allocation for 'Uncontrolled Crossing Improvements'. This includes for example, the construction of dropped (pram) kerbs at well known informal crossing points or the installation of tactile paving facilities at uncontrolled crossing points to assist the blind and partially sighted.

Additional locations have been identified by Officers since the last meeting of the Panel and they include a number of crossings within Colebrook Lane, Loughton and Buckhurst Way, Buckhurst Hill.

3.2.3 Safer Roads Programme

Schemes identified under this programme are assessed on historical injury/accident data within the road, to understand which engineering measures will give the greatest rate of return and will offer the most impact. The budget allocations can support schemes for 'Sites of Concern' and 'Area Identified Safety Schemes' where Members would like to see some improvements or low cost remedial action carried out, to improve safety for highway users.

Members will like to note that a large amount of effort is being directed by Officers and partners in progressing the Collision Site Remedial and Route Safety Improvements schemes. Safety audits are being completed and the comments of which are assisting in finalising the designs. Officers foresee orders being placed with the approved Contractor imminently, with anticipated commencement on site in the New Year, unless noted otherwise below.

B1393, M25 to Wake Arms Roundabout: Due to design complications with this scheme, it will not be possible for this to be delivered within the 2009/10 programme of works and it will therefore be deferred and considered for inclusion in the 2010/11 programme of works as appropriate.

Pudding Lane, Chigwell: The informal consultation period has now ended and the formal consultation process is due to commence shortly. With regards to the build-outs, the speed limit must be installed first and is dependent on the consultation period and any objections received. Taking account of the timing, the signing works are provisionally scheduled to commence December 09, with the build-out works to follow.

3.2.4 Public Rights of Way

Byway 21, Fyfield: As reported at the last meeting of the Panel, we have experienced some technical difficulty pertaining to a retaining wall and culvert. Officers have been liaising with partners in relation to this structure and these works have now been ordered with the contractor, however the estimate now exceeds the initial budget. The scheme also now necessitates a temporary closure order due to the works required, which has meant that it has incurred additional costs. This has left Officers with insufficient funds to carry out the Moreton Byway 1 and Beauchamp and Berners Roding Byway 31 schemes. Officers will endeavour to gain cost savings on the Byway 21 scheme, but at this stage it seems inevitable that Byway 1 and 31 will be deferred to the 2010/11 programme of works.

3.2.5 Passenger Transport Improvements

These schemes are selected using criteria as published in the "Demand for Passenger Transport" document and are developed jointly with the Essex County Council Passenger Transport team. The programme includes improvements to facilities on particular routes and installation or replacement of bus shelters.

Routes 541, 542, 543: The works to these Quality Bus Partnership improvement schemes are currently underway and should be complete at the time of the meeting.

Bus passenger shelters: At the last meeting of the Panel, Members were advised of shelter installations at the following locations: Chigwell Lane, Chigwell; and Rectory Lane, The Broadway and Oakwood Hill, Loughton. Since this meeting, locations have now changed to the following: Roundhills, Waltham Abbey; Marlescroft Way junction with Oakwood Hill, Loughton; Millwell Crescent, Chigwell and Coopersale Common, Epping. Due to this very recent alteration, site meetings have been arranged with the contractors for inspection of the sites, and detailed cost estimates are being provided, so that these works can be programmed as quickly as possible.

Passenger Transport Improvements also includes 'Safer Journeys to School Highway Works'. Working in conjunction with schools to improve the safety of pupils and families on their journeys to

and from school, this can include improved signage, cycle facilities, signing and lining, road markings and pedestrian guard rails.

The following schemes have currently been cancelled as the processing of the traffic regulation orders associated with these schemes dictate these will not be complete within the financial year. However Officers are liaising with the Safer Journeys to School team to develop these schemes further so that, if they are to go ahead in the 2010/11 programme, they will be pre-prepared for implementation. The Panel Members will be updated as confirmation of these schemes is received.

- Debden Park High School
 - St John Fisher
 - Epping Upland Primary
-

4. Community Initiative Fund

4.1 2008/09 applications

Nine projects were approved in 2008/09 within the Epping Forest District for delivery within the 2009/10 programme of works and these are detailed within **Appendix C**. The schemes within Theydon Bois and the installation of dropped kerbs in Station Way, Buckhurst Hill are now complete.

Loughton; signage: Officers are liaising with the Parish Council, Essex County Council Cycling Officers and the Corporation of London in developing the design of the signage required for walkers and cyclists.

Waltham Abbey; signage: Officers have been requested by the Town Council to allow for signage to be installed on existing lamp columns and are currently investigating the implications of sign loading on the columns and will report back as this scheme progresses.

All other projects are progressing well, with orders already placed with the Contractors and Manufacturers.

4.2 2009/10 applications

The bidding process for 2009/10 has now closed. Officers received a total of 20 applications from the Epping Forest District; ranging from speed reduction schemes, installation of pedestrian crossings, improving footways and installing bollards. Officers are currently carrying out viability analysis and estimates on these applications. Once this has been completed the submissions will be presented to the CIF Co-ordinator ready for the judging panel to assess. The judging panel will sit in April/March 2010 and will give final approval for the grant amounts. Members will be updated once successful bids are known at the end of the financial year.

5. Localism Budget

The Localism Revenue schemes address a number of highway problems and incorporate a wide variety of measures including parking and speed restrictions, improvements to or introduction of, pedestrian crossing facilities and other traffic management improvements.

Current projects are detailed in **Appendix D**

London Road, Abridge: The consultation process has now been completed. The introduction of a 30 miles per hour speed limit meets the Department for Transport and Essex County Council criteria. Therefore the works order with the Contractor and the traffic regulation order are currently being processed.

Hastingwood Road; Mill Street; Harlow Common, Matching: Speed assessments have been carried out on Hastingwood Road and Mill Street, these have yet to be completed on Harlow Common and Foster Street. Once the resulting data has been received, this will be reported to the Panel.

Waltham Road, Nazeing; Thornwood Road, North Weald; Woodside, Thornwood:

Speed assessments had been carried out at these locations with a view to lowering the speed limit. The analysis of results has established that these sites do not meet the Department for Transport and Essex County Council criteria and will therefore not be carried out.

6. Area Parking Review

Buckhurst Hill

The analysis, post the consultation process, has been completed and agreement has been confirmed by the Epping Forest District Council policy holder. Currently Officers are working to amend and update the drawings to the residents agreed comments.

Epping

The analysis, post the consultation process, has been completed and agreement has been confirmed by the Epping Forest District Council policy holder. Currently Officers are drafting the traffic regulation order schedules.

Loughton Broadway

The public consultation is now complete and Officers are compiling the results for analysis with Epping Forest District Council by early December 09.

7. Developer Funded Schemes

Langston Road, Oakwood Hill, Chigwell Lane – Junction improvements: The design is being finalised following recent minor changes. It is anticipated works will start on site February/March 2010.

Former ECC Highways Depot, Ongar: The level survey has been completed on site. Officers believe a retaining wall will be required due to the level data. Members will be aware that land purchase is required to carry out this project and initial discussions with the landowner demonstrate reservations with the location of the crossing.

8. Highway Maintenance Revenue Budget

8.1. Highway Rangers

The Highways Rangers service is part of the localism initiative. In recent months the budget for Rangers has been reduced County wide and as such Members should note that it is anticipated that the initiative within the Epping Forest District is likely to cease this month.

Works already completed and scheduled are detailed within **Appendix E**

8.2. Reactive Accelerated Maintenance Initiative (RAMI)

This initiative, now completed, accelerated action on highways defects (i.e. potholes), to improve the condition of the highways network. During a three month period in excess of 900 potholes were treated with first-time permanent fixes on 80 roads throughout the Epping Forest District.

9. Epping Forest Transport Strategy

Officers would like to update Members with current progress on the Epping Transport Strategy. Monies are currently being made available to the West Area Office for conditional maintenance to the highways and improvements to street furniture, within the central area of the Forest. Officers are investigating these locations and are liaising with the Corporation of London in finalising priorities. Updates will be provided to the Panel in due course.

10. Conclusion

Members are invited to discuss the report and offer comments pertaining to current works and programming.
