

# Epping Forest District Council

## **LOCAL HIGHWAYS PANEL**

**Tuesday, 21st September, 2010**

**Place:** Council Chamber, Civic Offices, High Street, Epping

**Room:** Council Chamber

**Time:** 7.00 pm

**Democratic Services Officer** Rebecca Perrin (Direct Line 01992 564232)  
Email: [rperrin@eppingforestdc.gov.uk](mailto:rperrin@eppingforestdc.gov.uk)

**Members:**

Councillors: Ms S Stavrou (Chairman), R Bassett (Vice-Chairman), R Barrett, W Breare-Hall, Ms C Edwards, C Finn, D Jacobs, Mrs S Jones, B Judd, L Leonard, A Lion, Mrs J Sutcliffe, Ms S Watson and D Wixley

Local Council Members: C Buttling, K Angold-Stephens, Mrs D Borton, A Buckley and A Purkiss

---

**1. APOLOGIES FOR ABSENCE**

**2. SUBSTITUTE MEMBERS**

To report the appointment of any substitute members for the meeting.

**3. MINUTES (Pages 3 - 18)**

To confirm the minutes of the last meeting of the Local Highways Panel held on 22 June 2010.

**4. TERMS OF REFERENCE (Pages 19 - 20)**

To note the Terms of Reference. (Attached)

**5. LOCAL HIGHWAYS PANEL REPORT (Pages 21 - 58)**

To receive a report from the Highways Liaison Officer.(attached)

**6. PARKING REVIEWS**

The Assistant Director (Technical) Environment and Street Scene to report on the Parking Reviews.

**Local Highways Panel**

**Tuesday, 21 September 2010**

**7. ANY OTHER BUSINESS**

**8. DATE OF NEXT MEETING**

Thursday 25 November 2010, Council Chamber, Civic Offices, Epping.

# Agenda Item 3

## EPPING FOREST DISTRICT COUNCIL COMMITTEE MINUTES

**Committee:** Local Highways Panel                    **Date:** Tuesday, 22 June 2010

**Place:** Council Chamber, Civic Offices,    **Time:** 7.00 - 9.58 pm  
High Street, Epping

**Members Present:** Ms S Stavrou (Chairman), R Bassett (Vice-Chairman), R Barrett, W Breare-Hall, C Finn, D Jacobs, Mrs S Jones, L Leonard, A Lion, Mrs J Sutcliffe, Ms S Watson, D Wixley,

**Parish Reps:** K Angold-Stephens, Mrs D Borton, A Purkiss and A Buckley

**Other Councillors:** J Hart, J Knapman, Mrs J H Whitehouse, Mrs E Webster and Mrs L Wagland

**Apologies:** - Mrs C Edwards

**Officers Present:** K Durrani (Assistant Director Technical (Environment and Street Scene)), P Massie (Acting Area Highways Manager, West Essex), T Baker (Assistant District Manager), Mrs R Tanfield (Highways Liaison Officer), A Ruffell (Senior Traffic Engineer), S G Hill (Senior Democratic Services Officer), R Perrin (Democratic Services Assistant) and P Rose (West Essex Traffic Officer)

### 55. SUBSTITUTE MEMBERS

There were no substitute members for the meeting.

### 56. MINUTES

#### RESOLVED:

That the minutes of the meeting held on 23 March 2010 be taken as read and signed by the Chairman as a correct record subject to the addition of attendance for Councillors A Purkiss and Councillor C Pond.

### 57. MATTERS ARISING

There were no matters arising.

### 58. TERMS OF REFERENCE

The terms of reference were noted.

### 59. LOCAL HIGHWAYS PANEL REPORT

The panel received a short presentation from the Acting Area Highways Manager for the West Essex Area, Peter Massie defining the Localism Initiative and the roles and responsibilities of the Local Highways Panel, allowing the community to have an influence on highways issues. Additional information for new Panel Members could

be found on the ECC website or by contacting the West Area Office. ([highways.westarea@essex.gov.uk](mailto:highways.westarea@essex.gov.uk))

The Highways Liaison Officer, Rosa Tanfield informed the Panel that budgets were being finalised and due to recent Government announcements on in-year efficiency savings, ECC were currently working through the impact of these savings on the programme. As such officers had been instructed to place orders up to the value of 50% of the budget whilst awaiting the finalised figures.

The current budgets for the Capital and Revenue totalled £4,715,280 of spending across the District on highways maintenance, traffic management improvements and all-purpose maintenance. Furthermore funding had also been identified for a major surfacing overhaul programme to target the deterioration brought about by the poor weather conditions during the winter period. This had been incorporated into the Capital programme and the Department of Transport had allocated £189,915 for pothole repairs and patching work in order to return the network to conditions comparable to prior the winter period.

Members commented on the programme of works 2010/11 only identifying indicative dates for some of the schemes rather than all of the schemes listed and how the additional £333,333 funding for the surfacing overhaul programme had been allocated across the County.

Officers advised that they had identified schemes whilst awaiting the finalised budget to allow works to begin and that the maintenance budget allocations were calculated using a formula that took into account, the types of roads, population and length of roads across District.

The list of Priority 1 road and footway maintenance projects approved by the panel for the 2010/11 budget had been incorporated into the programme. Officers had also identified additional roads that had experienced serious deterioration beyond those that had already been identified and approved by the Panel and the Area Office had set targets for the level of surface dressing undertaken in the programme of works. Members had before them this list of schemes and Members agreed for the inclusion of these into the programme. The roads that had not been included would remain on the list and if further funding became available later in the year, they would be added to the programme.

Officers informed the Panel that the traffic improvement schemes included the completion of the positive signage review in Nazeing, four locations that had been included in the Safer Roads Improvement programme and additional funding allocated for two route studies, where a high number of treatable road collisions had been identified. These were subject to the budget allocations set by County.

Members enquired about the historical accident information that the County uses when selecting the sites, so that they could explain to residents why certain sites have been identified.

Members were asked to note that the ECC Speed Management Strategy had recently been under review and would be ratified in the coming year, involving a Countywide review on all Priority 1 and 2 roads to ensure that they adhered to the new Policy.

One Public Rights of Way improvement application had been successful for funding and officers would update the panel accordingly.

The Bus Infrastructure Upgrades received a budget of £136,550 to allow for assessment and improvement on routes and three schools within the Epping Forest District would receive funding through the Safer Journeys to School Programme, with other additional locations to be identified.

The Highways Community Initiative Fund had been confirmed and allocated to enable £104,500 of the schemes to be achieved.

Officers advised Members that Localism Initiative allows the Panel to prioritise and oversee the localised highway improvement schemes and the time table of works for the Highway Rangers. The budget allocation for the Local Highway Panel for 2010/11 was £129,275.

Officers informed the Panel that the budget allowed for the Highways Rangers to carry out 6 months work at £60,000, installation of disabled bays at £2,000, new signs and lines at £2,000 and several schemes that were not completed in the last financial year that had a political commitment from the Cabinet Member for Highways and Transportation for £45,000. This taken into account, the Panel would have £20,275 for traffic improvements. Schemes could be identified from those that the Panel had approved as a high priority at the last meeting on 26 January 2010.

In addition, £5,000 had been allocated for the replacement of trees, in locations identified by the Panel. Members were requested to identify locations where trees had been removed historically so that they could be replaced and advice the Highways Liaison Officer Rosa Tanfield. (rosa.tanfield@essex.gov.uk)

Members were disappointed that schemes which were not completed in the last financial year would now affect the 2010/11 budget considerably.

Members discussed the merits of the Highways Rangers and the service they provide around the whole District. There was divided opinion on the whether the cost of the service for the 6 months warranted the reduction in locally determined schemes being implemented across the District in comparison to the minor maintenance but essential jobs carried out in the Parishes by the Rangers. Members asked whether there were alternative ways of performing the Highways Rangers jobs.

The Assistant Director Technical (Environment and Street Scene), Kim Durrani advised that EFDC could provide a joint service similar to the Highway Rangers for half the cost and that this could be investigated.

Members enquired about the process for completion of a Traffic Regulation Order. The Acting Area Highways Manager for the West Essex Area advised that schemes were put through a pre-design process, followed by an informal consultation, then a formal consultation. At each stage, if any objections and comments were received, consideration and review would need to be taken on the design. He advised that this is then followed by public advertisements and processing of the Order through the Legal Department at County Hall to produce the Traffic Regulation Order. The process normally takes approximately 12 months.

Councillor J Hart, a Ward Member for Loughton Forest spoke on behalf of the residents from Meadow Road, Loughton about the parking problems endured with commuters and local employees parking within the street all day. The residents had advised previous Members of Panel in March 2010 of a petition signed by 80% of the residents, looking for a parking permit scheme. Residents had been advised that the Department of Transport (DoT) were piloting a parking scheme for cul-de-sac roads.

Members discussed the parking problems in Meadow Road, Loughton and whether an alternative solution could be put forward, including further investigations funded by ECC, if the DoT pilot scheme was not possible.

Officers advised that all parking reviews were currently suspended and no new parking reviews would be taking place. They were awaiting a response from the DoT about the pilot scheme and would advise the Panel accordingly.

Councillor L Wagland, a Ward Member for Chigwell Village spoke on behalf of residents about the request for a pedestrian crossing at the Manor Road East of Tomswood Road. The scheme had been given high priority at the last meeting because of the case put forward by residents. The Ward Member suggested that the pedestrian refuge listed as an alternative solution within the available Locally Determined Budget would not be suitable causing the pedestrians to become spread across the carriageway rather than a safe passage across the road being created. Residents reported several accidents that have happened within the last 5 years and they were surprised that there were no records of these.

Members discuss the estimated costs of £170,000 for a puffin crossing at the junction of Manor Road East of Tomswood Road in relation to the available Locally Determined Budget of £20,275 and whether a more economical solution could be found. Questions were raised about a possible transfer of funds intended for a highways maintenance initiative costing £63,000 on Mount Pleasant Road, Chigwell to subsidise a pelican crossing at the Manor Road junction for an estimated £40,000 and have a reduced amount of work carried out on Mount Pleasant Road.

Members also agreed that should it not be possible to achieve funding from the maintenance scheme that EFDC and the Parish Council would investigate whether funding could be obtained elsewhere for the additional £20,000 required for the scheme.

Members requested that officers look into alternative traffic improvements on the 14 schemes that the panel members approved as a high priority in light of the current financial restrictions.

**RESOLVED:**

1. That the report of the Highways Liaison Officer be noted;
2. That the Panel noted the budgets for Maintenance and Traffic Improvements;
3. That the Panel agreed to the additional maintenance schemes identified by officers and their inclusion within the 2010/11 programme;
4. That Members agreed to the allocation of the Locally Determined Revenue Budget for the disabled bays, signs and lines, completion of 2009/10 schemes and Highways Rangers Scheme;
5. That EFDC will investigate the possibility of performing a Highway Ranger service at a reduced cost for approximately 12 months;
6. That the Panel formally applies to the Cabinet Member for Highways and Transportation, the transfers of funds from the highway maintenance initiative/footway maintenance budget for a scheme at Mount Pleasant Road, Chigwell, to provide a zebra crossing at Tomswood Road, Chigwell and request alternative maintenance to the footway;
7. That EFDC and Chigwell Parish Council shall investigate whether funding could be obtained for £20,000 to fund the zebra crossing in Tomswood Road, Chigwell; and

8. That Members noted the tree replacement funding and would advise officers of identified locations.

**60. ANY OTHER BUSINESS**

Members enquired about the progress of the Parking Reviews for Epping, Buckhurst Hill and Debden, Loughton.

The Portfolio Holder for Operational Planning and Transport, Councillor Ms S Stavrou advised that she had attended a meeting with the County Portfolio Holder for Highways and Transportation, Councillor Norman Hume, where he had promised that the County Council would undertake a through review of the issues surrounding the Parking Reviews.

The County Council was currently considering all options and would be taking legal advice; therefore no further comments could be made. The Portfolio Holder for Operational Planning and Transport would provide additional information and a further update at the next Cabinet meeting on the 19 July 2010.

Members asked whether the drainage cleansing programme continued to be provided around the District and if so whether officers could supply a programme.

Officers advised that the cleansing programme continued throughout the District and they would supply Members with the details of the programme.

**61. DATE OF NEXT MEETING**

Noted that the next meeting would be held on Tuesday 21 September at 7.00 p.m. in the Council Chamber, Civic Offices, Epping.

**CHAIRMAN**

# Agenda Item 4

## Local Highways Panel, Epping Forest District Constitution and Terms of Reference

### 1. Title

The Panel shall be known as 'Epping Forest District Local Highways Panel'.

### 2. Terms of Reference

- a) To review and make comment upon the revenue and capital programmes of highway works for the District submitted each year by the local Area Highways Manager
- b) To consider proposals for and the funding (including joint funding) of highway schemes submitted by constituted bodies such as the Epping Forest District Council, Parish Councils, Residents' Associations or similar elected bodies which represent the local community
- c) To consult the public on its proposals and priorities
- d) To oversee and set priorities for schemes funded through the localism process and the work of the Highway Ranger service
- e) To make recommendations for project approval to the Essex County Council Cabinet Member for Highways & Transportation
- f) To monitor the progress of approved schemes through reports received by the local Highways Manager or their nominated representative
- g) To monitor and review the Council's car parking service
- h) To consider requests for reviews of existing or the implementation of new parking restrictions within the district
- i) To receive, review and comment upon County Council Highways strategic documents on speed and freight management (referred from the Safer, Cleaner, Greener Scrutiny Standing Panel)
- j) To maintain an overview on highways matters relating to the "Nazeing Action Group" (referred from the Safer, Cleaner, Greener Scrutiny Standing Panel)
- k) In liaison with the Safer, Cleaner, Greener Scrutiny Standing Panel, monitor the level of those killed and seriously injured on the District's highways (referred from the Safer, Cleaner, Greener Scrutiny Standing Panel)
- l) To consider any other relevant highway matter referred to the Panel from time to time by other Council constituted Committees, Panels or Groups.

### 3. Membership

- a) Voting Members - 14 District Councillors appointed at each Annual Meeting of the District Council.

- b) Co-opted Members with Voting Powers - 5 Parish Council representatives, two for South, two for East and one for West covering the District Council's Area Plans Sub-Committee, nominated by the Local Councils' Liaison Committee for the District.

#### 4. Chairman

The Chairman of the Panel shall be the Epping Forest District Council Cabinet member with responsibility of Highway and Parking Matters.

#### 5. Meetings

- a) Meetings of the Panel shall be held on at least six occasions in each Council year at the Civic Offices, Epping at the date and time indicated on the agenda.
- b) Meetings may be held at other venues if the Panel so decide.
- c) Meetings shall be open to the press and public.
- d) Minutes and agenda of the Panel meetings shall be circulated to the following:
  - Panel Members
  - All District Councillors
  - Each Parish and Town Clerk
  - County council Portfolio Holder with responsibility for Highways
  - District and County Council Officers.
- e) The quorum for the Panel meetings shall be no less than 6 voting members.

#### 6. Officers

- a) Essex County Council Highways shall nominate a head officer who shall attend all meetings of the Panel for the purpose of supporting and giving advice on highways matters.
- b) Epping Forest District Council will support the Panel by the attendance of relevant officers from:

Environment & Street Scene  
Democratic services (Secretary Support)

And such other officers as may, from time to time, be required.

#### 7. Representations at Panel Meetings

- a) Any Parish or Town Council representative or any District Councillors who is not a Panel Member shall be able to request that any item within the Panel's terms of reference shall be placed on the agenda for any meeting.
- b) Any such person may attend the meeting concerned and address the Panel on that item.

## DISTRICT OF EPPING FOREST LOCAL HIGHWAY PANEL – 21 SEPTEMBER 2010 REPORT BY AREA HIGHWAY MANAGER – ESSEX COUNTY COUNCIL

---

### Purpose of report

- To provide Members with a report on Highway issues within Epping Forest District.
  - To provide sufficient information on schemes so that decisions on local priorities can be made.
  - Members are invited to offer suggestions and requests for future works.
- 

### Background

A programme of Capital works for 2010/11 has been implemented. This report will provide details of the programme with the status of the schemes.

Members are asked to consider the schemes District wide and suggest additional schemes that might be investigated for possible inclusion in a future programme of works.

---

### Budgets

Budgets and programmes have been adjusted following Government spending announcements and as such, Officers are actively managing budgets and resources during this period of uncertainty in line with these efficiency savings. Within the Epping Forest District, these savings have affected both the Safer Roads Improvement and Passenger Transport Improvement programmes. This is discussed further below. No other changes have taken place with any other traffic or maintenance allocations for Epping Forest.

---

### Maintenance

Appendix A, page 10-11, details the proposed Capital Maintenance Programme. Members will be pleased to note that a large number of schemes have now been completed.

---

### Traffic Improvements

The capital traffic schemes set for the Epping Forest District are detailed within Appendix B, page 12-14

---

#### Safer Roads Improvement Programme

The 'Cluster Site' collision site remedial schemes have seen a reduction from £107,500 to £55,000 and the 'Route Study' budget has been reduced from £34,744 to £17,372. To ensure an effective programme, the Road Safety Improvements team has given priority to schemes which were started in 2009-10 and require completing, schemes that have designs partially or fully completed and those schemes where parts of the work can be readily separated and financed in 2010-11 with the

remainder to be completed in 2011-12. This means that the schemes at A121 Woodridden Hill, Waltham Abbey; Coopersale, Epping and B1393, Epping shall not be going ahead in this financial year, but shall be considered for inclusion in the 2011-12 programme. However, the introduction of the 40 mph at the B1393 shall be achieved under the Epping Forest Transport Strategy works. The schemes at A414 Canes Lane, North Weald Bassett; Common Road, Roydon and A113, Abridge shall be going ahead this year, but with a reduced budget. Any works that cannot be achieved in this financial year to these schemes shall be carried over to the 2011-12 programme.

At the last meeting of the Panel, Members requested statistical data pertaining to these schemes and they are presented below:

**A414 Canes Lane, North Weald Bassett** (during period 01/02/2004 to 31/01/2009)

Fatal	Serious	Slight	Total
1	14	15	

There are three main types of collisions at this site:

- Collisions at the junction of the A414 and Hastingwood Road.
- Lane changing collisions on the northbound approach to the M11 roundabout.
- Nose to tail collisions on the northbound approach to the M11 roundabout.

**Common Road, Roydon** (12/11/2004 and 11/11/2009)

Fatal	Serious	Slight	Total
	10	10	

**A113, Abridge** (during period 28/01/2005 and 27/01/2010)

	Fatal	Serious	Slight	Total
From the A128 to Passingford Bridge (7.2km)	3	12	28	43
From Passingford Bridge to Abridge (5.1km)	1	6	26	33
From Abridge to the Essex border (5.5km)	1	6	34	41

It was mentioned at the last Panel meeting that the Speed Management Strategy was due to be ratified in this financial year. This has now been done and the document can be found on the ECC website or using the following link:

[http://www.essexcc.gov.uk/vip8/ecc/ECCWebsite/content/binaries/documents/Speed\\_Management\\_Strategy288.pdf?channelOid=null](http://www.essexcc.gov.uk/vip8/ecc/ECCWebsite/content/binaries/documents/Speed_Management_Strategy288.pdf?channelOid=null)

So far, the speed limit review in terms of data gathering has been completed. This has indicated where limits are in accordance with, below or above the guidelines given in the Department for Transport (DfT) circular 1/2006. A review will now be undertaken on all requests for speed limit changes, received by the Area Offices. Consultants working on behalf of ECC have undertaken a review of all speed limits on 'A' and 'B' classified roads and the results of those reviews are presently being analysed. The process by which the Speed Management Strategy shall be implemented across the County shall be phased. The initial phase will now be undertaken by Officers to identify all 'village' limits identified in the review for a possible speed reduction in line with the new Strategy and circular 1/2006. Details of emerging schemes will be reported to a future meeting of the Panel.

All historical requests and any future requests for speed limit changes received by Officers shall now be logged and assessed under the Speed Management Strategy review.

## **Public Rights of Way**

Officers anticipate that the works on Byway 31 shall be completed by mid-September. However, should the weather make the ground conditions so wet that they have to be suspended the completion date may be delayed.

The works being undertaken involve filling deep ruts and low areas with large grade recycled crushed concrete material and surfacing with a finer grade material. Localised ditch clearance and culvert installation is being carried out where necessary to improve drainage.

Prior to these improvement works, this route had become difficult and impassable for walkers and horse-riders during winter and periods of wet weathers. These essential works will make the byway easily accessible for all categories of user, at all times of the year.

## **Passenger Transport Improvements**

The Bus Infrastructure Upgrade budget and programme has been impacted by Government announcements on efficiency savings with a budget reducing from £136,550 to £102,412. This has affected the improvement schemes planned on Services 250 and 505. These are now currently on hold until funding approval is received and may be deferred to the 2011/12 programme. Lower cost sites have been added to the programme however. These are noted in the attached schedule as "Newly added".

The Safer Journeys to School programme has seen a reduction from £18,800 to £9,350, however additional sites have been identified and added to the schedule as previously reported to the Panel.

## **Highways Community Initiative Fund (HCIF)**

Members will note from the last Panel meeting that funding was allocated to seven CIF schemes, including the pedestrian crossing at North Weald Bassett, which had been on the Panels' "Reserve List" of schemes. The approved CIF schemes are listed and updates are provided on the schedule in Appendix B

---

## **Epping Forest Transport Strategy**

If available, Officers will provide a verbal report at the meeting on the current progress.

---

## **Developer Section 106 funding**

Developer money has been secured to fund the following schemes this financial year:

### **A1168 Chigwell Lane / Langston Road / Oakwood Hill - Junction Improvement**

The improvement works being carried out at this junction have the following benefits:

- Improve traffic capacity at the junction by updating the existing traffic signal installation with current technology and increasing length of right turn lane for traffic accessing Langston Road
- Improved right turning lanes
- Improved pedestrian facilities

It has not been possible to install pedestrian phases into the traffic signal design because it will reduce the traffic capacity of the junction excessively.

### **Rectory Road, Chigwell – continuation of the cycleway**

---

## **Highway Localism Initiative**

### **Tree Replacement**

In addition to the Locally Determined budget, the Cabinet Member for Highways and Transportation has identified £5,000 for the improvement and enhancement of local communities through the planting of trees. At the last meeting of the Panel, Members were requested to identify locations where trees have been removed, but not replaced. Six locations have been identified in Theydon Bois and one in Buckhurst Hill. Further locations are being identified and checked with colleagues at EFDC.

Members are urged to pass the message onto their constituents and report to Officers any locations where trees have been removed and never replaced, or areas that could be improved with tree planting. The planting season runs from November to March and so it is intended for a list of possible location to be brought to the next meeting of the Panel for approval.

### **Locally Determined Revenue Budget (LDB)**

As part of the Localism Initiative, the Highway Panel are tasked with prioritising and overseeing localised highway improvement schemes and influencing the timetable of works carried out by the Highway Rangers.

The Locally Determined Revenue Budget is a fund made available to those Districts in which a Local Highway Panel has been formed. It enables them, within a finite budget allocation, to carry out the Highway Rangers service and to implement schemes of importance in the community. The budget allocation provided to the Epping Forest District for 2010/11 is £129,275. At the last meeting of the Panel, Officer presented a possible option for the use of the fund.

### **Pedestrian crossing – Manor Road, Chigwell**

Members agreed that the scheme for a pedestrian crossing on Manor Road Chigwell was of high importance. An estimated cost for a zebra crossing at this location would be £40,000. In order to achieve a fund of £40,000, Members considered that a saving through the deployment of a Ranger type service through EFDC at a lower cost than ECC, would provide £20,000 that could contribute to the scheme. In addition Members requested that Officers investigate the possibility of reducing the footway maintenance scheme at Mount Pleasant Road, Chigwell to enable a further £20,000 to be transferred from this scheme. Confirmation has been received from the Cabinet Member for Highways and Transportation that the £20,000 allocation required from the footway maintenance scheme can go ahead. The progress of this is discussed further below:

**a. The Highway Rangers**

Since the last meeting of the Panel it has been confirmed that EFDC are unable to deliver a Highway Ranger service due to a number of reasons. Subsequently, Members are now asked to consider the following proposals in order that funding can be achieved to implement the pedestrian crossing in Manor Road, Chigwell.

**Option A:** Officers have initiated the Ranger service. If Officers continue delivery of the ECC Ranger service to the value of £60,000 (for approximately 5 months), this would create a £20,000 saving in order that the pedestrian crossing can go ahead. The timetable for the Rangers could be determined by the Panel (i.e. to carry out 3-week month or a month off after every two, etc)

**Option B:** If Officers deliver a 6-month (or any other variable period) ECC Ranger service, to a timetable as determined by the Panel, this would provide a saving of £10,500, thus further funding would need to be taken from the footway maintenance scheme at Mount Pleasant Road, Chigwell.

The Highway Rangers are an important element of the Localism Initiative. They are vital in helping to improve local communities by carrying out minor works to enhance the environment, which may not otherwise have been given priority for revenue funding.

The Rangers essentially work to the requirements of the Local Highway Panel, carrying out day-to-day maintenance tasks such as clearing untidy areas, sign cleaning, removing unlawful signs, street clutter and many other minor, yet important tasks to improve the local environment. Since the last meeting of the Panel, a letter was distributed to all Parishes and an article published in the Members Bulletin. Responses were received across the District. Officers would encourage Members to continue spreading the message that the Rangers have been launched and forward requests to Officers. The works carried out by the Rangers so far, are listed in Appendix C, page 16-18.

**b. Disabled bays and adhoc signs and lines**

In previous years, an allocation for the installation of disabled bays has been made from this budget; an allocation of £2,000 so that works can continue in 2010/11 and an additional allowance of £2,000 for the installation of new adhoc signs and lines was agreed by the Panel on 22 June 2010.

**c. Completion of 2009/10 schemes**

At the last meeting of the Panel, Members were presented with a list of schemes which were not completed in the last financial year and yet have political commitments from the

Cabinet Member for Highways and Transportation. The majority of preliminary works had already been completed on these schemes; however, a value of £45,000 was required to finalise them. Members approved that these should be progressed to completion.

• London Road, ABRIDGE	£2,500
<b>New 40mph speed limit</b> <i>Officers are currently investigating the possibility of solar powered signs, which will be installed as soon as possible</i>	
• Amendment 6, Batch 1100	
• District wide	£15,000
<b>Traffic Regulation Order updates and omissions, including disabled bays not yet advertised</b> <i>The designs are currently being finalised following comments received from the Legal Department</i>	
• Hastingwood Road, Mill Street and Harlow Common	£12,000
<b>New speed limit</b> <i>Officers are currently arranging the sealing date with the Legal Department. The works pack is currently being compiled for the Contractor.</i>	
• Debden Lane	£3,500
<b>30mph speed limit</b> <i>Officers are revising the speed limit, with new plans being submitted to the Legal Department</i>	
• Traps Hill	£4,000
<b>Waiting restrictions</b> <i>The consultation has now been completed, with one objection received and to be resolved.</i>	
<b>GRAND TOTAL</b> <u>£45,000</u>	

These approvals and the impact on the budget are summarised below:

	<u><b>OPTION A</b></u>	<u><b>OPTION B</b></u>
a. <b>Highway Rangers (ECC)</b>	£60,000	£69,775
b. <b>Disabled Bays</b>	£2,000	£2,000
b. <b>Signs and Lines</b>	£2,000	£2,000
c. <b>Completion of 2009/10 schemes</b>	£45,000	£45,000
Available budget (Manor Road, Chigwell zebra crossing £40,000)	£20,275	£10,500
<b>Total</b>	<u><b>£129,275</b></u>	<u><b>£129,275</b></u>
 <b>Mount Pleasant Road Chigwell</b> (Footway maintenance scheme)	 £63,000 <b>-£20,000</b> <u>£43,000</u> (70%)	 £63,000 <b>-£29,500</b> <u>£33,500</u> (53% of original scheme)

## Future Schemes

At the last meeting of the Panel, members requested that a review be undertaken by Officers of the list of schemes that have been proposed to the Panel. This is within Appendix D, page 19 onwards

Additional schemes and comments have been added (these are indicated in bold) and the presentation has been altered to enable easier comparison. Officers have now grouped the requests into the following headings:

- **Congestion** Schemes to improve flow of traffic
- **Drainage** Surface water alleviation schemes
- **Drive Compliance**
- **Informal crossings**
- **Junction improvements** Improvements in visibility or conspicuousness of junctions
- **Parking** Schemes to over-come parking issues
- **Pedestrian** Improvements to pedestrian safety, journeys and amendments or additions to the footway network
- **Signage** Schemes that do not fall within the adhoc signs budget already ring-fenced
- **Speeding** Schemes to address speeding concerns
- **Speeding and Parking**
- **Speeding and Pedestrian**
- **Weight restriction** Schemes are subject to the ratification of the Sustainable Freight Strategy

If Members are not satisfied with the category to which a scheme falls, please advise Officers so that this can be reviewed.

The high-ranking schemes are summarized (in no particular order) below:

<b>Matching</b>	Downhall Road/Little Laver Road/Watery Lane	Re-alignment of priority of junction	£5,000-£7,500	<b>Junction Improvement</b>
<b>Nazeing</b>	St Leonard's Road	Village Gateway and repositioning of VAS	£2,000	<b>Speeding</b>
<b>Fyfield</b>	B184	2 x VAS either end of 30mph zone	£4,500 for solar powered VAS	<b>Speeding</b>
<b>Buckhurst Hill</b>	Westbury Road	Build-outs	£30,000	<b>Driver Compliance</b>
<b>Buckhurst Hill</b>	Church Road and Brook Road	Pedestrian phasing	£5,000-10,000 investigation costs	<b>Pedestrian</b>
<b>Chigwell</b>	Manor Road j/w Vicarage Lane	Junction improvement	£30,000	<b>Junction Improvement</b>
<b>Epping Town</b>	Hennall Street j/w Grove Lane	Installation of pedestrian crossing	£7,500 per pedestrian refuge; £80,000 for a controlled zebra crossing	<b>Pedestrian</b>
<b>Loughton</b>	A121 High Road (near Spring Grove)	Signal controlled crossing	£170,000+ for the installation of a Puffin Crossing	<b>Pedestrian</b>
<b>Waltham Abbey</b>	Crooked Mile, N of Saxon Way	Signal controlled crossing	£250,000 for the installation of Puffin Crossings either side of the carriageway	<b>Pedestrian</b>
<b>Waltham Abbey</b>	Crooked Mile, N of Monkswood Avenue	Signal controlled crossing	£150,000 for upgrading existing signals	<b>Pedestrian</b>
<b>Chigwell</b>	B173 Manor Road W of Tomswood Road	Signal controlled junction	£170,00 if a suitable location is found for a puffin crossing; £7,500 per refuge is a alternative options should a suitable location not be found; £40,000 zebra crossing	<b>Pedestrian</b>
<b>Loughton</b>	Church Hill (near the Uplands)	Signal controlled crossing	£80,000 zebra crossing	<b>Pedestrian</b>
<b>Epping</b>	Station Road	Signal controlled crossing/pedestrian refuge	£170,000 puffin crossing	<b>Pedestrian</b>
<b>Buckhurst Hill</b>	Forest Edge	Speed humps	£40,000	<b>Speeding</b>
<b>Epping</b>	Stonards Hill j/w Stewards Green Road	Junction improvements with Stewards Green Road	£30,000	<b>Junction improvements</b>
<b>Waltham Abbey</b>	Roundhills	Elderly crossing sign or road humps	£1,000-1,500 per sign; £40,000 for humps	<b>Speeding</b>
<b>Waltham Abbey</b>	Roundhills j/w Honey Lane	Junction protection	£3,000	<b>Junction improvements</b>
<b>Epping Upland</b>	B181	Road outside 'Travellers Friend' – thrust bore horizontally across the pond to drain holes opposite		<b>Drainage</b>
<b>Total</b>			<b>£1,024,500+</b>	

## **Conclusion**

Members are invited to discuss the report and put forward any comments pertaining to current works and programming. Members are also requested to comment on proposals put forward.

Chigwell	o/s 30 Lechmere Avenue		The no motor vehicles, cycles, animals on mown verge sign has been knoced down but propped up by resident. Please remove the signs and post and reinstate the soil in the hole
North Weald Bassett	Hows Mead		Pick up suction kerbs that are loose all over the place

# APPENDIX D

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Loughton High Road j/w The Drive	Removal of traffic lights and re-direction of traffic	Improvements to the traffic lights junction of Loughton High Road with Brooklyn Avenue/The Drive. Include the removal of the additional phase of the traffic lights that controls the egress of vehicles from Brooklyn Parade into Brooklyn Avenue, which causes unnecessary congestion into the High Road and The Drive. All vehicles exiting from Brooklyn Parade should be required to turn left into Brooklyn Avenue. Current speed limit 30mph. This will improve highway safety, reduce congestion and is supported by the Town Council.	This project was part of a 2008/2009 'Congestion Busting' scheme, which was widely unsupported by various group because of the proposal to remove Brooklyn Parade, as this may cause dangerous manoeuvres. Officers have concerns about introducing 'left turn only' from Brooklyn Parade. Until further investigation is carried out on the timings of the lights at peak hours to reduce the use of Brooklyn Parade. <b>Officers to put forward proposals that differ significantly from the 'Congestion busting' scheme proposed in 2008/9</b>	£5,000-10,000 investigation costs
Loughton	Roding Road	Rephasing of traffic lights and additional lining to enable a left and right filter lane at the lights	Currently the traffic queue for the junction of Roding Road at the junction with Valley Hill/Oakwood Hill and often backs up from the traffic lights beyond the underground bridge, causing congestion at the mini roundabout at the junction with Alderton Hill. This problem is not isolated to peak periods. There is also insufficient road width for two lines of traffic, however the road is regularly obstructed by parked vehicles on the inside lane and the introduction of additional 'No waiting' restrictions on Roding Road, north west of Hill on the easterly side of the road, whilst enabling two lines of vehicles to wait for the change of traffic lights at the junction. This is likely to prove unpopular with and be vetoed by the residents/shopkeepers. However this will reduce junction, it will help to open up the carriageway to fully accommodate the two way traffic. <b>This can be implemented at an estimated cost of £3,000.</b>	£5,000-10,000 investigation costs; should the investigation prove the proposal is feasible the project costs would be in the region of £50,000-150,000. Changes to waiting restrictions is likely to be objected to by residents and shop-keepers. Whilst this will have only a minimal impact on congestion at the signal junction, it will help to open up the carriageway to fully accommodate the two way traffic.
Loughton	Beech Lane	A historical request for a one way system along Beech Lane, giving traffic flow from A104 to High Road	Approval will need to be sought from Essex County Police. Please note that such a scheme may increase vehicle speed. <b>If a one-way system is implemented, Officers would recommend traffic calming measures are included as part of the scheme. However this would increase the costs of the scheme to £25 - 30,000 including TRO costs</b>	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining
Med	Med	One way road	Buckhurst Hill	Approval will need to be sought from Essex County Police. Please note that such a scheme may increase vehicle speed. <b>If a one-way system is implemented, Officers would recommend traffic calming measures are included as part of the scheme. However this would increase the costs of the scheme to £25 - 30,000 including TRO costs</b>
5	6		Buckhurst Hill	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining
Med	Med	One way road	Buckhurst Hill	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining
28	Med	One way road	Loughton	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining
29	Med	One way road	Lambourne	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining
84	Med	Suggestion to ease the parking on the road	Newly added	£3,500 Traffic Regulation Order
86	Med	Priority working over bridge	Newly added - Forward visibility may well be a concern with the implementation of priority working	£3,500 Traffic Regulation Order
98	Med		Newly added	£3,500 Traffic Regulation Order

JUNCTION IMPROVEMENTS**

**EssexWorks.**  
For a better quality of life

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Downhall Road/Little Laver Road/Watery Lane	Re-alignment of priority junction of Downhall Road/Little Laver Road/Watery Lane, Matching. Erection of signs warning 'Access Only Unsuitable for HGVs' or 'Unsuitable for Sat Navs' at both entrances of Water Lane. HGVs are using Water Lane as a through route and it is totally unsuitable for such vehicles. The junction layout is straight through from Downhall Road to Water Lane, although the signage points to Little Laver Road, this only encourages the use of Water Lane.	Re-alignment of priority junction	The accident data has been received and it has established that there have been no recorded personal injury collisions in the vicinity. Officers have some concerns that turning of large vehicles such as HGVs and tractors may not be possible or will raise safety concerns. These types of vehicles frequent these roads, and not only the length but also the width of these vehicles must be considered in the design. Officers have carried out an 'Autotrack' assessment that models the swept path of all types of steered vehicles. This has shown that HGV's cross either the centre line or cut across the verge. In addition, centre lines and cat's eyes would also be required to highlight the trajectory of the new alignment of the bend and to delineate the new road layout, after historically Little Laver Road giving way to Watery Lane/Downhall Road. Essex County Council Road Safety Engineers have advised the vegetation on the corner adjacent to 'Corner House' needs to be removed to increase and improve the sight lines. Double yellow lines will need to be installed opposite the junction to prevent the use of current parking at this location.	£5,000-£7,500
Manor Road j/w Vicarage Lane	Junction improvement		A more detailed investigation into turning movements would be required	£30,000
Market Place	Junction improvements		There are currently no feasible engineering options at this time	Newly added - Already has existing junction protection. Extra signage could confuse drivers and add unnecessary street clutter

**Local Highway Panel "Reserve List" 2010/11**  
**JUNCTION IMPROVEMENTS**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
	Junction improvements with Stewards Green Road	Newly added	Continuing problems that residents are experiencing illegal car parking on both sides of the entry to the Roundhills estate from Honey Lane. This causes a daily problem for young mothers with prams and pushchairs and disabled residents / wheelchair users, as they try to pass on the pavement. They all have - most dangerously - to move into the actual roadway in order to get past these obstructions which are parked illegally on pedestrian footpaths.	£30,000
	Stonards Hill j/w Stewards Green Road	Roundhills j/w Honey Lane	An island at the junction of Woodside and NM High Road was said to be the best way of discouraging sat-nav juggernauts turning in and getting stuck at a width restriction south of the trading estate (which would allow emergency service vehicular access from B1393)	Newly added. The junction is at the end of a residential area, with a 40 mph speed camera near-by. Proposal will still allow HGV access as there is a need for the existing industrial units to have deliveries

PARKING**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Oakwood Hill j/w Chigwell Lane	The restoration and protection of the grass verge in Oakwood Hill from the junction with Chigwell Lane adjacent to the Roding Valley Nature Reserve on one side and the Oakwood Hill Industrial Estate on the other to create a 'gateway' entrance into this part of Loughton. Current speed limit 30mph. Suggested solutions including parking restrictions (double yellow lines), installation of timber bollards, and additional planting, trees and bulbs to create an attractive 'avenue' similar to the Remembrance Avenue in Colchester approached from the A12. The grass verge adjacent to the Nature Reserve is used for commuter parking from Debden station. The verge permanently shows the impact of vehicles and deposit mud onto the road. As parts of the verge become impassable, vehicles park further from the junction, continuing the problem. The introduction of the Debden parking scheme, following the recent review is likely to exacerbate the problem, to the detriment of the area. The scheme is supported by the residents and town councillors	Additional lining, bollards and additional planting	The planting suggestion may not be included in scheme by ECC, however the installation of bollards will prevent footway/verge parking and maybe sufficient without the need for additional waiting restrictions	£600 per standard bollard; £800 per wooden bollard
Loughton	Convert SYL along forest stretch to DYI, as congested parking at weekends when hall is hired out	Forest Edge	Newly added	£3,000
		Buckhurst Hill		
		Sheering		
		Luxford Place		
		Commercial vehicles parking in Luxford Place	Commercial vehicles from Luxford Moorings are parking in Luxford Place	£3,500 waiting restrictions

# Local Highway Panel "Reserve List" 2010/11 PEDESTRIAN

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Brook Road	A) Brook Road links with Buckhurst Hill with the London Borough of Waltham Forest. It is heavily used by vehicles and pedestrians. Without a footpath, pedestrians, children and elderly are at risk. B) Request to create a footpath at Buckhurst Hill end of Brook Road to join up with existing footpath at the Waltham Forest End. Brook Road runs between Epping New Road and Whitehall Road, where there is a bus stop and Bancroft's school is within walking distance. There are possible land purchase issues with Corporation of London and the scheme may require moving a ditch or building a raised path over the ditch. Local residents have made representations to local Councillors. Supported by Cllr Ann Haigh and Cllr Jill Sutcliffe, Chairman Joyce Darby and Cllr Angela Cass.	The land is the property of the Corporation of London. A possible way leave will be needed to create the footpath. Cllr Sutcliffe has forwarded a letter sent by City of London stating that: "If you are able to persuade ECC or the DC to support this project I am confident that the Conservators will provide permission for the works." 30/03/10 Officers have been given the in principle agreement with the Corporation of London and neither them or the Officers have no adverse comments about the proposal.		£25,000-50,000 footpath construction
Buckhurst Hill	Creation of footpath	It seems that the best location would be adjacent to the present exits from St Giles car park and Nazeingbury Parade. Possibly a small portion of the bushed in front of the Parade might have to be removed. Currently users of the Church car park, preschool parents and pupils and residents of Elizabeth Close and Nazeing Road weave their way between traffic. They don't walk to the lights at Nazeingbury crossroads. There are obvious risks of accidents between the vehicles and pedestrians, because of the speeding and misjudgement. One advantage of a crossing would be a reduction of the parking on the verges by heavy lorries while the drivers visits the shops. There is wide support for a crossing here.	Detailed investigations would be required to determine the pedestrian desire line (i.e. where pedestrians are likely to cross/cross appropriately). <b>The feasibility of the scheme will be subject to a detailed investigation being carried out to determine the requirements of a pedestrian crossing facility. Officers have concerns with the proximity of a proposed crossing to the existing traffic signals at the Nazeing crossroads [Local Transport Note 2/95(S.2.15.1)]</b>	£80,000 for a controlled zebra crossing
Nazeing	Installation of pedestrian crossing (zebra)	Hemnall Street j/w Grove Lane	This proposal will be subject to the footway width being sufficient to accommodate a crossing and pedestrian desire lines identified through survey and assessment. It must also meet with the pedestrian crossing regulations. Consideration could be given to installing pedestrian refuges which may reduce vehicle speeds. However a detailed survey will be required. <b>A detailed survey has been undertaken, which shows one possible location. This would require land to be taken from the Corporation of London to construct a new footway as well as possible statutory undertakers diversionary works. The scheme would also be subject to a safety audit which may raise road safety concerns</b>	£7,500 per pedestrian refuge; £80,000 for a controlled zebra crossing
Epping Town	Installation of pedestrian crossing	A121 High Road (near Spring Grove)	In view that this site has a high vehicle/pedestrian conflict ratio, it is recommended that a signalized facility be considered at this location. The width of the road may preclude a refuge, but there is good visibility at the site for a crossing. Although the 85th percentile speeds of traffic in below 30mph northbound, it is faster southbound and may not be deemed suitable for a zebra crossing. The volume of traffic is quite high at this location, but the majority of pedestrian activity is to and from the school. Assuming there is not a school crossing patrol solution to the peak hour demands, the interruption to traffic flow with a computerized signalized crossing would be restricted to these periods only.	A historical request for a pedestrian crossing.

# APPENDIX D

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Crooked Mile, N of Saxon Way	Crooked Mile, N of Monkswood Avenue	Signal controlled crossing	<p>A historical request for a pedestrian crossing.</p> <p>See Crooked Mile N of Saxon Way</p> <p>It was noted that there were reasonable gaps in traffic to allow pedestrians to cross safely at most times. Vehicle speeds are relatively low, but consideration should be given to those crossing, including elderly and unaccompanied children. In addition, there has been slight injury to one pedestrian in the last 5 years. For these reasons, a crossing may be considered. However, there is a crossing at the south of the site. The existence of the right turn lane means that positioning a refuge in that area may be difficult to achieve. Alternatively, a refuge may be considered prior to the commencement of the filter lane in the area of Dolphin Court.</p>	<p>£150,000 for upgrading existing signals</p>
Waltham Abbey	Waltham Abbey	Pedestrian refuge	<p>A historical request for a pedestrian crossing.</p> <p>In view of the speed of traffic over 30mph 85th percentile and in view of the number of elderly/children crossing and that there has been one slight injury to a pedestrian within the last 5 years, consideration could be given for an additional pedestrian refuge facility north of Station Way. The precise location of any island will need to be carefully considered in a final design to ensure the nearby junction and accesses of not compromise the safety of pedestrians.</p>	<p>The width of the road does not favour a refuge. This site would provide space for an alternative crossing facility. There is a relatively low pedestrian crossing figure at this site, which is on a fairly busy and fast road. However, there are a number of elderly people crossing and a small number of children at peak times only. Accident figures show that one pedestrian has been slightly injured over the past 5 years. The speed of traffic is higher than desirable and initially it is recommended that traffic calming be considered to help reduce speeds and thus make crossing opportunities easier. However as the A123 is a priority 1 route, no traffic calming will be permitted</p>
Highways Ref	47	Traffic calming/speed reduction	<p>A historical request for a pedestrian crossing.</p>	<p>£40,000 for zebra crossing; £100,000+ for signal controlled crossing (both would require an updated pedestrian survey to determine the need</p>

**Local Highway Panel "Reserve List" 2010/11  
PEDESTRIAN**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
B173 Manor Road j/w Stanwyck Road	Junction improvement/pedestrian refuge	A historical request for a pedestrian crossing, however since the survey was carried out pedestrian phasing has been installed at the junction of Manor Road and Fencepiece	At this site, the width of the road would preclude a refuge but provides space for a crossing facility. The site is considered hazardous due to the speed and volume of the traffic suddenly turning in and out of the cut-through and the number of pedestrian casualties over the past 5 years. Although there are not a large number of pedestrians crossing, there is a need to cross for the park and nursery. It is felt that changes to the junction itself would greatly improve the safety of this site. Consideration could be given to converting the cut through to one-way operation, or altered to become a left turn filter for traffic turning left from Hainault Road westbound in to Manor Road. This may transfer traffic flow, loading other junctions, and the effect of this would need to be further assessed. However, any such junctions changes could incorporate traffic calming elements to address the relatively high 85th percentile and could possibly include a refuge facility to aid pedestrian usage.	£170,000 for puffin crossing
B173 Manor Road W of Tomswood Road	Signal controlled junction	A historical request for a pedestrian crossing, however there is limited available locations due to the presence of crossovers.	Although there are not a high number of pedestrians at these two crossing locations, there have not been any pedestrian injuries in the last five years, yet due to traffic speed and behaviour, these locations are potentially very dangerous. There is a case to consider signalizing the junction itself with pedestrian phase option where appropriate. This would have the benefit of assisting pedestrians to cross safely and to provide some sort of traffic control which with traffic calming features could reduce the speed and improve safety for drivers.	£170.00 if a suitable location is found for a puffin crossing; £7,500 per refuge is an alternative options should a suitable location not be found; £40,000 zebra crossing
B173 Manor Road E of Tomswood Road	Signal controlled junction			£170.00 if a suitable location is found for a puffin crossing; £7,500 per refuge is an alternative options should a suitable location not be found; £40,000 zebra crossing
Turpins Lane	Chigwell	Chigwell	See B173 Manor Road E of Tomswood Road	Pedestrians crossing were relatively low, as are the vehicle flows. There is no particular delay in crossing the road. However, it must be born in mind that there have been 21 casualties, including two fatal, on this road over the past 5 years. It is advised that signalizing the junction with the inclusion of pedestrian phasing, would benefit pedestrians and perhaps contribute to traffic calming with a view to minimizing accidents. Yet Officers advise that there are no suitable locations for a crossing to be installed and <b>sight lines may be affected as the road layout narrows</b>
Highways Ref	53	Med	54	55
		High		56

# APPENDIX D

## Local Highway Panel "Reserve List" 2010/11 PEDESTRIAN

Road/Location	Project	Application details		Officer Comment	Indicative Estimated Costs
Tomswood Road	B181 Lindsey Street	Church Hill (near the Uplands)	Signal controlled crossing	<p>There were only a relatively small number of pedestrian movements recorded and the speed of traffic was generally fairly slow on this arm of the junction. In addition, no injuries for pedestrians have been recorded in the past 5 years. The conditions at this location were not considered to be difficult for pedestrians to cross. In view of this, it is not felt necessary to provide a separate crossing facility at this location, but safety at the junction could be greatly improved if a signalized arrangement was introduced. A signalized phase may not be required on this leg; however, the traffic control across the whole junction could provide improved regular headway gaps in traffic flow and thus provide greater crossing opportunities in Tomswood Road. Officers advise that a refuge at the junction may be possible.</p>	£7,500 pedestrian refuge
Chigwell	Epping	Loughton	Traffic calming/speed reduction	<p>The width of the road does not favour a refuge, but potentially provide space for a crossing facility. Although the site is a cut through for traffic at peak hours, it is a fairly quiet site and no children were noted to cross, nor have there been any recorded pedestrian casualties' in the past 5 years. As the 85th percentile speed of traffic is 34 and 36mph, consideration could be given to some form of traffic calming. However, there does not appear to be any difficulty in crossing the road. It must also be noted that the footway is narrow and the grass verge is the property of the Corporation of London</p>	£170,000 puffin crossing
Low	Low	High	Signal controlled crossing	<p>The number of pedestrians crossing Church Hill was relatively high and flows remained constant throughout the day. Similarly, the recorded traffic flows were high. It is therefore suggested that a signal-controlled crossing is installed at this location. It is recommended that anti-skid surfacing is provided also as visibility requirements exceed the minimum for a signal-controlled crossing. A suitable location has been identified North East of the Uplands for a possible zebra crossing installation, however this may affect the Traps Hill junction. No other suitable location has been identified. <b>There is an existing pedestrian refuge at the proposed location for the new crossing</b></p>	£80,000 zebra crossing
57	58	60	61	<p>A historical request for a pedestrian crossing. (Staples Road School) Supported by Councillor Mrs C Pond</p> <p>Signal controlled crossing/pedestrian refuge</p> <p>A historical request for a pedestrian crossing.</p>	<p>Pedestrian flows were fairly high and remain fairly constant throughout the day. There were however very few vulnerable pedestrians recorded crossing the road and no pedestrian accidents have been reported in the last 5 years. It is suggested that a further feasibility study could be carried out into the location of a crossing, due to the proximity of junctions, residents' driveways and bus stops. As Station Road is a priority 1/2 route, traffic calming will not be permitted at this location. Locations are limited near to the underground station. <b>There is an existing zebra crossing near the junction with High Street</b></p> <p>£170,000 puffin crossing</p>
				<p>It is not considered entirely necessary that a crossing is installed at this location, as a facility already exists on the desire line. However, pedestrians to the east of Loughton Way are still required to cross Loughton Way to reach the existing pedestrian crossing. It is therefore suggested that pedestrian facilities are considered as part of the signal controlled junction on Loughton Way and possibly Roding Lane. However further investigation would be necessary to ensure that the provision of a pedestrian phase would not cause excessive delay and congestion at the signals.</p>	<p>£5,000-10,000 feasibility study; £200,000 signal design and implementation</p>

# APPENDIX D

## Local Highway Panel "Reserve List" 2010/11 PEDESTRIAN

**EssexWorks.**  
For a better quality of life

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Rectory Lane	Pedestrian refuge	A historical request for a pedestrian crossing. (Alderton School)	<p>Pedestrian flows on Rectory Lane are fairly low, with the exception of the AM peak. The number of vulnerable pedestrians was also low and it is not considered that there is currently a large latent demand to cross the road. A signalled crossing is therefore not recommended at this location. However, traffic flows and speeds were high throughout much of the day making it difficult to cross. It is therefore suggested that the installation of a pedestrian refuge just south of Newman's Lane and associated narrowing of the carriageway, possibly on the bend, is considered. This would assist pedestrians in crossing the road while reduction vehicle speeds. A similar facility has already been installed further south on Rectory Lane.</p>	£7,500 pedestrian refuge
Pyres Lane	Signal controlled crossing/pedestrian refuge	A historical request for a pedestrian crossing.	<p>Although a pedestrian refuge is provided to the north of junction with Harold Cr, data shows the desire to cross south of the junction closer to the r/about. A crossing facility is suggested between Harold Cr and the r/about. This would either need to be installed to the north of the junction with Mile Cr or on the approach to the r/about. As vehicle speeds are recorded as higher than 25mph a signalled pedestrian crossing would be more appropriate than a Zebra crossing. It is therefore recommended that further investigation is undertaken into the provision of a signal-controlled crossing between Mile Cr and Harold Cr. The visibility exceeds minimum requirements for a formal crossing and so it is recommended that anti-skid surfacing is provided. Although pedestrian crossing data was not collected from the Parklands and Sewardstone Rd arms of the r/abouts, it is suggested that the provision of crossings are also investigated to assist pedestrians travelling to the schools and town centres. <b>New crossing should be proposed further North from the existing dropped kerbs, on the traffic island, to avoid vehicle crossovers either side.</b></p>	£7,500 to amend existing vehicle splitter island where appropriate
Hillyfields and Chester Road	Pedestrian refuge	A historical request for a pedestrian crossing.	<p>Near the shops a crossing could only be installed by removing some of the parking on both sides of the road. As parking is well used throughout the day, it is assumed that this is not a preferred option. A crossing could be installed further south slow Pyres Lane, but drop kerbs and driveway would have to be avoided. This may also be away from the pedestrian desire line. Although pedestrian flows are high throughout most of the day, traffic flows are low. Therefore pedestrians are likely to cross in the gaps without using a formal crossing. It is therefore recommended that no further action concerning a pedestrian crossing be taken at this site. There is currently a school crossing patrol at the junction of Hillyfields and Chester Road. <b>There is an existing crossing at the raised approach to the junction with Hillyfields and Chester Road</b></p>	£7,500
Alderton Hill	Pedestrian refuge	A historical request for a pedestrian crossing.	<p>Due to the low traffic levels and speeds it is suggested that a pedestrian refuge is installed on Borders Lane east of The Hawthorns, subject to sufficient road width. An additional pedestrian refuge south of Borders Lane again subject to sufficient road width and visibility. This would reduce the distance pedestrian from Alderton Hill have to walk to reach the school. The proximity of the school means there are a higher than average proportion of vulnerable pedestrians crossing the road. However, due to the presence of crossovers, the location of a pedestrian refuge will be very difficult. <b>The location is on a hill with restricted visibility</b></p>	£7,500

# APPENDIX D

## Local Highway Panel "Reserve List" 2010/11 PEDESTRIAN

**EssexWorks.**  
For a better quality of life

Road/Location	Project	Application details		Officer Comment		Indicative Estimated Costs	
Ivy Chimneys	Pedestrian crossing	A historical request for a pedestrian crossing.		The pedestrian count illustrates high volumes of parents and children crossing are concentrated in the morning and afternoon with very little pedestrian movement of the remainder of the day. In these circumstances a school crossing patrol is usually the best way of controlling and protecting these crossing movements. <b>There is reduced visibility due to the road being on an incline, with bends and carriageway width may be an issue if parking bay could not be used</b>		£7,500	
Epping	Honey Lane (Wood Green Road)	Pedestrian crossing		The pedestrian flows are very low and although traffic levels are high it is not felt that there is a latent demand to cross at this location. It is therefore recommended that no further action to is taken. <b>Very fast road with no footway on North side of Honey Lane</b>		£40,000 for zebra crossing	
Low	Waltham Abbey	Honey Lane (Stonyshotts)	Pedestrian refuge/traffic calming	Many of the pedestrians crossing are children who often need further assistance in crossing the road. Although traffic flow remains fairly constant throughout the day, there is a peak in vehicle flows at similar time periods to the peak in pedestrian traffic. It is therefore suggested that the installation of a pedestrian refuge be considered together with associated traffic calming measure to slow vehicle speeds. Careful consideration will need to be taken with regards to the siting of the crossing.		£7,500 pedestrian refuge	
67	Low	Med	70	The pedestrian flows recorded at this site are very low, and although traffic levels are high it is not felt that there is a latent demand to cross at this location. It is therefore recommended that no further action be taken at this site.		£40,000 for zebra crossing	
Sewardstone Road	Waltham Abbey	Goldings Hill	Pedestrian crossing	The pedestrian flow recorded was very low and although traffic levels are high it is not felt that there is latent demand to cross at this location. It appears that the main reason to cross the road is for the bus stop on either side of the road. It is therefore recommended that no further action be taken with regards to a pedestrian crossing.		£40,000 for zebra crossing	
71	Low	Low	72	Although pedestrians crossing is relatively high, traffic flows are low. The existence of lay-bys by the shops means that the construction of a pedestrian refuge in the vicinity of the shops is not feasible without some loss of the lay-by and due to the low traffic flow this is not recommended. However it is suggested that a pedestrian refuge could be considered south of Institute Road, to assist pedestrians accessing the school from the west of Coppersale Common		£7,500 pedestrian refuge	
Brook Road	Epping	Coopersale Common	Pedestrian refuge			£100,000+	Newly added - a feasibility study is required
Highways Ref	99

# Local Highway Panel "Reserve List" 2010/11 SPEEDING

Road/Location	Project	Application details		Officer Comment	Indicative Estimated Costs
Chester Road	Chicanes and pedestrian crossings	VAS	<p>Speed reduction measures for Chester Road to include the installation of Chicanes and a pedestrian crossing. Current speed limit 30mph. History of a serious accident involving a child, petition has been organized by residents, reports of speeding traffic including buses on this section of Chester Road despite the existing speed humps, the width of the road encourages vehicles to increase speed. Police have undertaken speed camera checks, initial suggestions of the installation of a VAS or SID was not thought to be sufficiently effective in this location, the use of Chicanes as in Willingale Road appears to be more effective way of calming traffic. Support from local residents and Town Councillors</p>	<p>It may be possible to achieve chicanes, however a detailed survey will need to be undertaken to find a suitable location, given the presence of vehicle crossovers and junctions. There may be no need for a controlled crossing, however a pedestrian refuge may be a better alternative. In either case a survey will be required to establish the most suitable location and type of crossing.</p>	<p>£12,000 per chicane; £80,000 for a controlled, zebra crossing; £7,500 per pedestrian refuge</p>
Manor Road	Village Gateway and repositioning of VAS	VAS	<p>Request for VAS due to current high speeds. Proximity to school and support from local representatives</p>	<p>No adverse comments associated with this proposal, however agreement would need to be sought from the Parish Council for support in funding any future maintenance costs associated with the VAS</p>	<p>£3,500 mains powered VAS; £4,500 solar powered VAS</p>
St Leonard's Road			<p>A VAS was positioned some 100m North of Tatsfield Avenue in St Leonards Road, Nazeing. This is about 300m after the entry point of the 30mph zone. It has no impact for the 300m and the pedestrian walkway is inadequate and narrow. Therefore a request has been made for the sign to be supplemented by a village gateway erected at the beginning of the built-up area on both sides. The B194 (St Leonards Road) is a busy route and is de-restricted immediately prior to the urban area. Entry speeds are typically in the 40/60mph range. It is important that these speeds are quickly reduced because of the pedestrian flow to the school and local shops. There is no road crossing until the lights at Nazeingbury. Many residents feel threatened by the speed limit.</p>	<p>The original VAS was located at a point that met Essex County Council criteria. This sign is 300m North of the speed limit signs. Gateways are possible, providing sufficient verge width is available.</p>	<p>£2,000</p>
Ongar Road			<p>The speed limit along Ongar road reduces from 60mph to 30mph outside the village hall. There are currently signs located here to warn traffic of the reduction in speed limit. However as these signs are placed along the roadside where there is foliage and trees, these signs are often obscured by overgrown trees. The newly introduced children's playground on Ongar Road at the Abridge Village Hall is within the 30mph speed limit zone and due to the presence of children in this locality is now more imperative for vehicles to be aware that they must reduce their speed to 30mph at the village gateway. The current signs are often obscured by trees, which are the responsibility of the residents and so are sometimes obscured for a length of time before they are cut back. A VAS would ensure that the traffic are aware of the reduction in speed. The wall at the entrance at the village hall has been knocked down twice and the house opposite has also had its wall knocked down at least three times.</p>	<p>Appropriate locations will need to be sought and agreement will need to be obtained from the Parish Council for support of future maintenance costs associated with the VAS</p>	<p>£4,500 for solar powered VAS</p>

SPEEDING**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Passingford	Various	1.) Triangle the end of Mill Lane, Toot Hill - kerb the triangle, landscape either flowerbed or flower tubs, to clean up eyesore, stop obtrusive parking and create a focal point 2.) Gateways at Toot Hill, 6no (3 lots of 2): One pair on Epping Road, one pair on School Road and one pair on Toot Hill Road. Could be decorative and would slow traffic as they are made aware they are entering a village area. 3.) Mini roundabout on A113 Stanford Rivers at junction with Church Road. reconstruction of a mini roundabout at this increasingly busy junction. Would reduce speed.	1.) The exact location would need to be identified with the Parish Council. 2.) The gateways are a sound proposal, however would be subject to there being sufficient verge width. 3.) A min-roundabout on the A113, which is a primary route is very unlikely to meet Essex County Council criteria	1.) £5,000-7,500. 2.) £1,200 per gateway
Stanford Rivers	B181	Outside Greenwood and Chequers - traffic calming in the form of different road surfaces, rumble strips approaching bend, speed reduction as for the Chambers Manor' corner, signing (e.g., bend, ice) and crash barriers	There have been a number of accidents whereby cars have gone into the front garden of Chequers and the land fronting Greenwood. Recently a car crashed into the garage of Greenwood, ending up on the garage roof; police estimated the car was travelling at 60/70mph. Although Greenwood is set back from the road, Chequers is not. It is understood that some accidents are caused by drivers not knowing the road. There is also the effect of frost/ice on the surface where vehicles skid and loose control. Proximity to All Saints Parish Church and the Parish Council Burial Ground. It is of concern to Parish councillors and local residents, particularly as the B181 has become a 'rat run' for the M11 and M25. There have been a major increase in traffic on the road and it is not unknown for lorries to have difficulty negotiating the bends causing traffic congestion on a road that has previously been free flowing.	Officer advise that the installation of rumble strips too close to residential properties would conflict with current guidelines. However road surfacing treatment would be possible, but would have maintenance implications and high initial installation costs. Signing can be reviewed. At first consideration there appears to be insufficient space for crash barriers. Information plates with warning signs could be incorporated in a scheme.
Low	34	Speed humps	To help reduce the impact of the road being used as a rat run	Newly added - It would only be possible to deter 'rat-running' with the introduction of measures such as speed humps or build outs, however the high frequency of vehicle crossovers may prevent such a scheme. A survey would be required
Highways Ref	71	Queens Road	Speed humps	£40,000
	80	Roundhill	Elderly crossing sign or road humps	£30,000
	85	Waltham Abbey		Newly added - a scheme such as road humps would need to be incorporated throughout the whole estate and not in isolation to ensure the impact of reducing vehicle speeds as desired
	87			£1,000-1,500 per sign; £40,000 for humps

**SPEEDING AND PARKING**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
	Wellington Road and Hampden Close	My concerns are around the use of Wellington Road as a rat run to the market on Saturdays, plus the amount of cars parked in the road at the junction of Wellington Road and Hampden Close, which obscure the view of oncoming traffic on Wellington Road and which will no doubt cause a serious accident in the near future. I think there should be traffic calming and parking restriction put in place in Wellington Road/Hampden Close	Newly added. Existing junction protection in force (sections of 'no waiting at any time' restrictions). Should a road hump scheme be proposed, a long consultation process shall need to be undertaken which will take approximately 18 months	£40,000 humps
Ward/Parish	North Weald	Traffic calming and parking restrictions

 For a better quality of life

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Honey Lane	Installation of pedestrian crossing, VAS and additional yellow lines	<p>On this section of Honey lane, there is a short but steep gradient in the road, which emphasises the speed of traffic. Because of the gradient and associated speeds, there have been a considerable number of accidents along the road. Residents within the area have accrued a large amount of evidence detailing incidents and have produced a petition. The proposed scheme is the installation of a pedestrian crossing where the current centre refuge is located, and the installation of a VAS at the bottom of the hill adjacent the shop. There may also be a requirement for further double yellow lines along this stretch of road, but resident needs must also be taken into account. The pedestrian crossing would slow traffic down, provide a safer means of crossing for the school and provide improved sightlines for traffic, due to no parking on the zigzags. The VAS would increase drivers awareness regarding their speed a the approach to the crossing and mini-roundabout. There have been a considerable amount of RTAs at this location. The current speed limit is 30mph but is not adhered to and rarely enforced. A 150 signature petition has been produced by local residents.</p> <p>The location of the pedestrian crossing will not be viable as it does not meet current criteria, an alternative location may be more suitable. This area has already been raised by Road Safety for possible inclusion in the 2010/11 Route Safety Improvements Programme. The site was no included within the 2010/11 Road Safety Improvements Programme. Alternative locations as yet are unidentified and would require detailed investigation. The VAS is currently being delivered under CIF</p>

WEIGHT RESTRICTION**

Road/Location	Project	Application details	Officer Comment	Indicative Estimated Costs
Hoe Lane	Weight restriction	Hoe Lane is a small winding rural road with a speed limit of 60mph. There are points which are not wide enough for vehicles to pass each other at speed. There are also blind bends which enhance the danger. HGVs regularly use this road in error, on an almost daily basis. The Parish Council is unable to get an agency to monitor and enforce the width restriction. However if a weight restriction was put in place, they would be able to contact Truckwatch, who would be able to monitor the situation. The local school is located on Hoe Lane and therefore the road is heavily used and there are many concerns and complaints. It has also been in the local paper on many occasions with concerns from local people.	This cannot be achieved until the Sustainable Freight Strategy is put in place	£3,000 costs associated with Traffic Regulation Order and signs
Lambourne	Weight restriction	Extremely heavy duty lorries are becoming more prolific. Residents cannot contemplate walking down the road to the park with two children in the pram, when she could come face to face with an extended juggernaut lorry on one of the blind bends or even a 'boy racer'. No pavements! She has no choice but to drive. And what about the listed buildings in Woodside?	Newly added - currently has a weight restriction
