24. HIGHWAYS RANGERS

The Panel was advised that the Highways Rangers scheme was in operation. Officers said that enquiries, following analysis by technical officers were passed onto the appropriate Highways Engineer who then referred it to the Rangers.

Members asked about vegetation growing over footpaths and the health and safety implications for this. The Rangers could work safely from the verge, officers could serve notice on the landowner if they didn't comply.

25. WINTER SERVICE PREPARATIONS

Essex County Council was currently encouraging Parish/Town Councils to participate in the Salt Bag Partnership. Each Parish/Town Council within the Partnership was being given one ton of salt for use on important pavements.

Not many of the Parish/Town Councils took part in the scheme. It was reported that:

1. There were not enough storage facilities for the salt.
2. There were not enough salt bins. Parish/Town Councils that had them reported that most bins were unusable and in a state of disrepair.
3. There were difficulties in manning the scheme.

County Councillor J Knapman advised that Chigwell Parish Council has a scheme for converting grass cutting vehicles to clearing snow. He agreed to pass on details to the Panel Chairman for circulation to Members.

26. ANY OTHER BUSINESS

The Chairman advised that a member of the North Essex Parking Partnership would be present for the next Panel meeting. A guest would also be arranged to discuss the installation of Bus Shelters and explain how Section 106 worked in relation.

Councillor J Knapman suggested that a bigger pot should be created by the divisions for the larger schemes. He suggested that every division put in £20,000 of their budget and a priority list be created. County officers commented that other Panels do not split their budgets into divisions and schemes were prioritised.

27. DATE OF NEXT MEETING

The next meeting was scheduled for 1 November 2012 at 7.00 pm in the Council Chamber.

1	BH&LS	Buckhurst Hill	Brook Road, Buckhurst Hill	Creation of footpath at Buckhurst Hill end of Brook Road, to link with existing footpath (Walham Forest end)	No footpath (heavily trafficked by vehicles and pedestrians), school and bus stop create demand	There are possible land purchase issues with Corporation of London and the scheme may require moving a ditch or building a raised path over the ditch. The land is the property of the Corporation of London. A possible 'way leave' will be required to create the footpath. Cllr Sutcliffe has forwarded a letter sent from the Corporation of London (CoL) stating that "if you are able to persuade ECC or the DC to support this project I am confident that the Conservators will provide permission for the works." 30/03/10. Officers have been given the 'in principle' agreement from the CoL. Neither the CoL nor the Officers have any adverse comments about the proposal. Likely that speeding is a perceived issue. Traffic calming further up Lower Queens Road will require removal of parking likely to receive objections. Recommend against scheme.	Member of Public	40k	1 year	Amber
	BH&LS	Loughton	Roding Road, Loughton	Rephasing of traffic lights and additional lighting to enable a left and right filter lane at the lights. Changing parking restrictions to allow additional lane of traffic.	Congestion	Removal of parking is likely to prove unpopular with residents/shoppers. However this will reduce congestion and improve air quality. It is proximity of Roding Valley High School and is supported by the Town Council. Rephasing of the signals and the provision of right turn and left turn filter arrows would require investigation into the changes of capacity. Existing waiting restriction Mon-Fri 2.30pm and Mon-Sat 8am-6.30pm and no waiting at any time at junctions.	Historic scheme list	45,000-10,000 investigation costs; works £50,000-150,000. Changes to waiting restrictions- £3,000.	9 months	Amber
4	BH&LS	Buckhurst Hill	Beech Lane, Buckhurst Hill	One way system along Beech Lane, giving traffic flow from A104 to High Road	TBC	Approval will need to be sought from Essex County Police. Please note that such a scheme may increase vehicle speed. If a one-way system is implemented, Officers would recommend traffic calming measures are included as part of the scheme.	Historic scheme list	£25 - 30,000 costs associated with traffic calming, Traffic Regulation Order, signs and lining	9 months	Amber
5	BH&LS	Buckhurst Hill	Westbury Road, Buckhurst Hill	Build-outs	Non-compliance with one-way system	A speed survey carried out on this road identified that in excess of 10 cars were recorded as travelling the wrong way along the one-way system in a 2 day period. These raised concerns, not only with Essex County Council, but also Essex County Police.	Historic scheme list	£30,000	9 months	Amber

7	BH&LS	Buckhurst Hill	Roding Lane/Loughton Way, Buckhurst Hill	Pedestrian facilities at signal junction Feasibility study agreed	Difficulty crossing road	It is not considered entirely necessary that a crossing is installed at this location, as a facility already exists on the desire line. However, pedestrians to the east of Loughton Way are still required to cross Loughton Way to reach the existing pedestrian crossing. It is therefore suggested that pedestrian facilities are considered as part of the signal controlled junction on Loughton Way and possibly Roding Lane. However further investigation would be necessary to ensure that the provision of a pedestrian phase would not cause excessive delay and congestion at the signals. 85	O&R	Fyfield	B184, Fyfield	2 x VAS either end of 30mph zone	Speeding	On the B184 Ongar/Dunmow Road the speed limit was reduced from 40mph to 30mph through the main drag of Fyfield in 2007. Whilst the 30mph limit has made some improvements, residents hope to enhance the scheme within Parish Council will prefer two solar powered mobile units. The locations will need to be determined by a speed survey to ensure that the proposal meets with Essex County Council criterion.	Historic scheme list	£4,500 for solar powered VAS	3 months	Amber

90	O&R	Lambourne	Hoe Lane, Lambourne	Weight restriction	Inappropriate HGV use.	Hoe Lane is a small winding rural road with a speed limit of 60mph. There are points which are not wide enough for vehicles to pass each other at speed. There are also blind bends which enhance the danger. The local school is located on Hoe Lane and therefore the road is heavily used and there are many concerns and complaints. Awaiting freight strategy. 117	WA	Waltham Abbey	Honey Lane, Waltham Abbey	Installation of pedestrian crossing, VAS and additional yellow lines	Speeding. Collision history.	The proposed scheme is the installation of a pedestrian crossing where the current centre refuge is located, and the installation of a VAS at the bottom of the hill adjacent the shop. There may also be a requirement for further double yellow lines along this stretch of road, but resident needs must also be taken into account. The pedestrian crossing would slow traffic down, provide a safer means of crossing for the school and provide improved sightlines for traffic, due to no parking on the zigzags. The VAS would increase drivers awareness regarding their speed at the approach to the crossing and mini-roundabout. The current speed limit is 30mph but is not adhered to and rarely enforced. Appropriate location has yet to be defined. On Strategic Route Network so will require formal sign off.	Petition	N/A	N/A	Red
118	WA	Waltham Abbey	Crooked Mile, North of Saxon Way and / or Crooked Mile, North of Monkswood Avenue, Waltham Abbey	Signal controlled crossing (s) feasibility study	Road safety	A pelican crossing is already located south of Monkswood Ave signalised junction. Subject to design considerations, a new signalised crossing facility could be considered in the area north of Saxon Way. However, because of the road width in this area there may be a need for staggered crossing facility, which would require road widening/carryway realignment to maintain the current traffic lane capacity. Further investigation will be required to access the impact and safe location of such a facility. On Strategic network, will require sign off.	Historic scheme list	£250,000 for the installation of Pelican Crossings either side of the carriageway (Saxon Way). £150,000 for upgrading existing signals (Monkswood Ave) FEASIBILITY study £5k	9 months	Red

As vehicle speeds are recorded as higher than 35mph a signalised pedestrian crossing would be more appropriate than a Zebra crossing. New crossing should be proposed further North from the existing dropped kerbs, on the traffic island, to avoid vehicle crossovers either side. On Strategic network so would require sign off. General Key

SCOOT

Split Cycle and Offset Optimisation Technique. This calculates the flow of vehicles along each spur of a junction and can then calculate the timings of the signals required to deal with heavier or lighter amounts of traffic during each cycle of the signals. Particularly good for peak and off-peak periods.

OTU

Outstation Transmission Unit. These are in signals and are controlled via the SCOOT system.

RMS

Remote Monitoring System. This allows the signals to report back to the main system in Threadneedle House to say that something is wrong with them.

MOVA

Microprocessor Optimised Vehicle Actuation. Similar to SCOOT but works better for isolated signals rather than larger junctions.

Prioritisation Criteria for LHP

The following criteria have been used to prioritise the schemes across the various disciplines:

Improvement Schemes

All schemes prioritised by the strategic criteria identified within the Local Transport Plan (these have been identified as criteria to enable a simple appraisal of a scheme's alignment to the HST / ICS / EssexWorks objectives).

- Improves connectivity of development / regeneration areas (Weighted)
- Reduces journey times / improves reliability along major urban / inter urban routes (Weighted)
- Reduces the incidence / severity of collisions (Weighted)
- Increases the availability / awareness of travel choice
- Improves interchange between modes / services
- Reduces CO2 emissions
- Improves the management of freight
- Reduces travel impacts on the natural / built / historic environment
- Improves public perception of safety
- Protects the value of existing assets
- Improves asset safety / standard / resillience
- Improves journey experience
- Improves travel options for those with disabilities / mobility constraints
- Improves access to further education / jobs / services for those at risk of isolation
- Promotes healthier lifestyles
- Improves the quality of public spaces
- Improves access to strategic road network / major rail interchange
- Increases role of voluntary / charity sector in transport service provision
- Responds to a priority identified through public consultation

Bus Stop Improvements

Prioritisation ranked by:

- Safety and Security
- Accessibility - physical accessibility and using the bus as a means to access key services (healthcare, education, etc)
- Punctuality & Congestion
- Customer Environment - making bus travel more comfortable for existing and potential customers

EssexITS

Scheme identified and prioritised by Five Year Road Map, based on the following criteria.

- Revenue Cost: Cost of item per annum including communications (and power ?) costs
- Work Type: An indication of the type of work, number does not indicate preference just identification
- Congestion:
- Customer information:
- KSI / Safety:
- Carbon reduction:
- VFM:
- Equipment Reliability: Contribution to the a more reliable asset

Safer Roads

Prioritisation based on quantifiable collision history (intervention level based on four injury collisions in the most recent three-year period).

SCP

Prioritisation based on

- Duty of care to ECC employees working in the road (weighted)
- Volume of pedestrians
- Volume of traffic

PROW

Prioritisation based upon:

- To meet legal criteria such as the Equalities Act or where new routes have been added to the Definitive Map by legal process
- To improve important links in the PROW network and to help access key services
- To have the greatest impact on the greatest number of users, particularly the more vulnerable
