A) No work on any phase of the development (with the exception of demolition works where this is for the reason of making areas of the site available for site investigation), shall commence until an assessment of the risks posed by any contamination within that phase shall have been submitted to and approved in writing by the Local Planning Authority. This assessment must be undertaken by a suitably qualified contaminated land practitioner, in accordance with British Standard BS 10175: Investigation of Potentially Contaminated Sites - Code of Practice and the Environment Agency's Guidelines for the Land Contamination: Risk Management (LCRM 2020) (or equivalent if replaced), and shall assess any contamination on the site, whether or not it originates on the site. The development shall only be carried out in accordance with the approved details unless the Local Planning Authority gives its written consent to any variation. The assessment shall include: (1) A survey of the extent, scale and nature of contamination and (2) An assessment of the potential risks to: human health; property (existing or proposed) including buildings, crops, livestock, pets, woodland, service lines and pipes; adjoining land; groundwater and surface waters; ecological systems; and archaeological sites and ancient monuments.

B) If following the risk assessment unacceptable risks are identified from land affected by contamination in that phase, no work on any phase of the development shall take place, until a detailed land remediation scheme has been completed. The scheme will be submitted to and approved in writing by the local planning authority. The scheme shall include an appraisal of remediation options, identification of the preferred option(s), the proposed remediation objectives and remediation criteria, and a description and programme of the works to be undertaken including the verification plan. (The remediation scheme shall be sufficiently detailed and thorough to ensure that after remediation, as a minimum, land should not be capable of being determined as contaminated land under Part IIA of the Environmental Protection Act 1990). The development shall only be carried out in accordance with the approved scheme. Following the completion of the remediation works and prior to the first occupation of the development, a verification report by a suitably qualified contaminated land practitioner shall be submitted to and approved in writing by the local planning authority.

 - b) How charging point usage will be charged amongst users;
 - c) The process and the triggers for identifying when additional passive charging points will become activated; and

- 8 Prior to any above groundworks, a strategy to facilitate super-fast broadband for future occupants of the site shall have been submitted to and approved in writing by the Local Planning Authority (LPA). REASONS

- 2 The proposed development by reason of its height, bulk and mass and the inclusion of basement with parking served by a car lift is considered of a poor design which results in a cramped and dominant form of development which is harmful to the visual character appearance of the existing properties and surrounding area contrary to policies CP2, CP7 DBE1, DBE3 & DBE9 of the adopted Local Plan 1998 & 2006, Policy DM9 of the Local Plan Submission Version 2017, and Paragraphs 126 & 130 of the NPPF 2021.

REASONS

- 1 The proposed development of the rear residential detached annex would result in cramped and unfavourable living conditions development for the future occupants of the annex and the access is unsuitable for such a use due to the design of the overall application and this is contrary to policies DBE3, DBE9 and DBE 11 of the adopted Local Plan 1998 & 2006, Policy DM9 of the Local Plan Submission Version 2017, and Paragraphs 126 & 130 of the NPPF 2021.
