Application Number:	EPF/0172/21
Site Name:	5 Grange Crescent Chigwell, IG7 5JB
Scale of Plot:	1:1250

Report Item No: 11

APPLICATION No:	EPF/0172/21
SITE ADDRESS:	5 Grange Crescent Chigwell IG7 5JB
PARISH:	Chigwell
WARD:	Grange Hill
APPLICANT:	c/o Ashley Robinson
DESCRIPTION OF PROPOSAL:	Outline application for demolition of the existing dwellinghouse and its replacement with a new build to provide 5 new flats (Revised scheme to EPF/1146/20). **SAC CASE NOW PROGRESSING**
RECOMMENDED DECISION:	Grant Permission (Subject to Legal Agreement)

http://planpub.eppingforestdc.gov.uk/NIM.websearch/ExternalEntryPoint.aspx?SEARCH_TYPE=1&DOC_CLASS_CODE=PL&FOLDER1_REF=647293

CONDITIONS

- 1 The development hereby permitted shall be commenced before the expiration of three years from the date of this permission or two years from the approval of the last of the reserved matters as defined in condition 2 below, whichever is the later.
- 2 Prior to commencement of the development, details of the layout, appearance, and the landscaping of the site (hereinafter called "the reserved matters") shall be submitted to the Local Planning Authority for approval before the expiration of three years from the date of this permission, and the development shall be carried out in accordance with the details so approved.
- 3 The development hereby permitted shall be carried out and retained strictly in accordance with the following approved plans: 01, 02, 03, 04 Rev A, 05 Rev A, and 06 Rev A.
- 4 Prior to preliminary ground works taking place, details of surface water disposal shall be submitted to and approved in writing by the Local Planning Authority. The development shall be implemented in accordance with the approved details, and shall be provided on site prior to the first occupation and shall be retained for the lifetime of the development.
- 5 Prior to any above groundworks, details and location of the parking spaces (including garages) equipped with active Electric Vehicle Charging Point(s) shall have been submitted to and approved in writing with the Local Planning Authority (LPA), unless otherwise agreed in writing with the LPA. The installation of EVCP shall be completed in accordance with the approved details and made operational prior to first occupation. The details must include details as follows:
 - Location of active charging infrastructure; and
 - Specification of charging equipment to be used.

- 6 Prior to any above groundworks, a strategy to facilitate super-fast broadband for future occupants of the site shall have been submitted to and approved in writing by the Local Planning Authority (LPA). The strategy shall seek to ensure that upon occupation of a dwelling, either a landline or ducting to facilitate the provision of a broadband service to that dwelling from a site-wide network, is in place and provided as part of the initial highway works and in the construction of frontage thresholds to dwellings that abut the highway, unless evidence is put forward and agreed in writing by the LPA that technological advances for the provision of a broadband service for the majority of potential customers will no longer necessitate below ground infrastructure. The development of the site shall be carried out in accordance with the approved strategy.
- 7 Prior to first occupation of the development, measures shall be incorporated within the development to ensure a water efficiency standard of 110 litres (or less) per person per day.
- 8 Prior to first occupation of the development, a scheme to enhance the ecological value of the site shall be submitted to and agreed in writing by the Local Planning Authority. The ecological value shall be quantified using the Biodiversity Impact Assessment Calculator (BIAC) where appropriate. The scheme shall be implemented in full prior to the occupation of the development hereby approved.
- 9 Prior to first occupation of the development, the Developer shall be responsible for the provision, implementation and distribution of a Residential Travel Information Pack for sustainable transport, approved by Essex County Council, to include six one day travel vouchers for use with the relevant local public transport operator. These packs (including tickets) are to be provided by the Developer to each dwelling free of charge.
- 10 No unbound material shall be used in the surface treatment of the vehicular access within 6 metres of the highway boundary.
- 11 The proposed use of this site has been identified as being particularly vulnerable if land contamination is present, despite no specific former potentially contaminating uses having been identified for this site. Should any discoloured or odorous soils be encountered during development works or should any hazardous materials or significant quantities of non-soil forming materials be found, then all development works should be stopped, the local planning authority contacted and a scheme to investigate the risks and/or the adoption of any required remedial measures be submitted to, agreed and approved in writing by the local planning authority prior to the recommencement of development works. In such instances, following the completion of development works and prior to the first occupation of the site, sufficient information must be submitted to demonstrate that any required remedial measures were satisfactorily implemented or confirmation provided that no unexpected contamination was encountered.

...and subject to the completion of a s106 Legal Agreement.

This application is before this Committee since the recommendation is for approval contrary to an objection from a Local Council and at least one non-councillor resident, on planning grounds material to the application (Pursuant to The Constitution, Part 3: Scheme of Delegation to Officers from Full Council).

Site and Surroundings

The site comprises of a two-storey semi-detached house, located within a built-up area of Chigwell. It is not listed nor in a conservation area. There are no protected trees within the site, nor is the site in a flood zone.

Proposal

Outline application with some matters reserved for demolition of the existing dwelling house and its replacement with a new build to provide 5 new flats (Revised scheme to EPF/1146/20).

The only points to be assessed at this stage are access and scale, matters relating to appearance, layout and landscaping are to be fully assessed via a future reserved matters applications.

The proposal was amended since its initial submission with the main changes being the reduction from 7 to 5 units, and all parties were reconsulted on these changes.

Relevant Planning History

EPF/3340/17 - Certificate of Lawful Development for proposed loft conversion with rear dormer – Lawful

EPF/3342/17 - Construction of new 2 storey dwelling, with accommodation in the roof, alongside the existing house at no. 5 Grange Crescent – Refused

EPF/3373/17 - Prior approval application for a 6-metre-deep single storey rear extension, height to eaves 2.7 metres and overall height of 3.3 metres – Prior Approval Not Required

EPF/1146/20 - Part single, part two storey rear extensions and loft conversion for the host property, number 5 Grange Crescent. New two storey side extension with rooms in the roof to form 1 No. new dwelling house. New/altered vehicular crossovers - Refused

Development Plan Context

Local Plan and Alterations 1998 & 2006 (LP)

Section 38(6) Planning and Compulsory Purchase Act 2004 requires that planning applications should be determined in accordance with the development plan unless material considerations indicate otherwise. The Development Plan currently comprises the Epping Forest District Council Adopted Local Plan (1998) and Alterations (2006).

The following policies within the current Development Plan are considered to be of relevance to this application:

CP1	Achieving Sustainable Development Objectives
CP2	Protecting the Quality of the Rural and Built Environment
CP3	New Development
CP6	Achieving Sustainable Urban Development Patterns
CP7	Urban Form and Quality
H2A	Previously Developed Land
H3A	Housing Density
H4A	Dwelling Mix
U3B	Sustainable Drainage Systems
DBE1	Design of New Buildings
DBE2	Effect on Neighbouring Properties
DBE3	Design in Urban Areas
DBE6	Car Parking in New Development

DBE8	Private Amenity Space
DBE9	Loss of Amenity
LL10	Adequacy of Provision for Landscape Retention
ST4	Road Safety
ST6	Vehicle Parking

National Planning Policy Framework 2021 (Framework)

The Framework is a material consideration in determining planning applications. As with its predecessor, the presumption in favour of sustainable development remains at the heart of the NPPF. Paragraph 11 of the NPPF provides that for determining planning applications this means either;

- a. approving development proposals that accord with an up-to-date development plan without delay; or
- b. where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless:
 - i. the application of policies in the NPPF that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or
 - ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole

The presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making, but policies within the development plan need to be considered and applied in terms of their degree of consistency with the Framework.

In addition to paragraph 11, the following paragraphs of the NPPF are considered to be of relevance to this application:

Paragraphs 126 & 130
Paragraph 180

Epping Forest District Local Plan Submission Version 2017 (LPSV)

Although the LPSV does not currently form part of the statutory development plan for the district, on 14th December 2017 the Council resolved that the LPSV be endorsed as a material consideration to be used in the determination of planning applications.

Paragraph 48 of the NPPF provides that decision-takers may give weight to relevant policies in emerging plans according to:

- The stage of preparation of the emerging plan (the more advanced the preparation, the greater the weight that may be given);
- The extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and
- The degree of consistency of the relevant policies in the emerging plan to the policies in the NPPF (the closer the policies in the emerging plan to the policies in the NPPF, the greater the weight that may be given).

The LPSV has been submitted for Independent Examination and hearing sessions were held on various dates from February 2019 to June 2019. On the 2nd August, the appointed inspector provided her interim advice to the Council covering the substantive matters raised at the hearing and the necessary actions required of the Council to enable her to address issues of soundness with the plan without prejudice to her final conclusions.

Following the Examination Hearing Sessions for the emerging Local Plan, the Council has prepared a number of changes, known as Main Modifications, to the Epping Forest District Local Plan Submission Version (2017) to address issues of soundness and/or legal compliance identified by the Inspector. These are put forward without prejudice to the Inspector's final conclusions on the Plan.

As the preparation of the emerging Local Plan has reached a very advanced stage, subject to the Inspector's Advice regarding the need for additional Main Modifications, the **highest weight** should be accorded to LPSV policies in accordance with paragraph 48 of Framework. The following policies are relevant to the determination of this application;

SP2	Spatial Development Strategy 2011-2033
H1	Housing Mix and Accommodation Types
T1	Sustainable Transport Choices
DM2	Epping Forest SAC and the Lee Valley SPA
DM3	Landscape Character, Ancient Landscapes and Geodiversity
DM5	Green and Blue Infrastructure
DM9	High Quality Design
DM10	Housing Design and Quality
DM11	Waste Recycling Facilities on New Development
DM16	Sustainable Drainage Systems
DM19	Sustainable Water Use
DM21	Local Environmental Impacts, Pollution and Land Contamination
DM22	Air Quality

Summary of Representations

Number of neighbours Consulted: 20. 19 responses received

Site notice posted: No, not required

A reconsultation exercise was carried out and the following responses were received.

MULTIPLE OBJECTIONS RECEIVED – Summarised as:

- Over-development;
- Insufficient parking provision/parking stress;
- Loss of privacy/overlooking;
- Inappropriate development/Not in keeping with street and area; and
- Noise and general disturbance.

CHIGWELL PARISH COUNCIL – The Council Strongly Objects to this application because the proposal does not provide adequate parking facility and a sustainability checklist is absent.

Planning Considerations

The main issues for consideration in this case are:

- a) Scale;
- b) Access; and
- c) The impact on the Epping Forest Special Area of Conservation.

Scale

The scale of the proposed building would have no material impact to the street scene or wider area, as it would still appear as a traditional two-storey dwelling with a subservient side element, and also maintain the symmetry of the pair of semis. To add, there is a visual gap of some 1.1 m from the common boundary with No 3 Grange Crescent, so there would be no terracing effect. On

balance, the proposed scale is acceptable. The end-design i.e. materials, finishing etc are a reserved matter.

To add, there would be no material impact to the living conditions of neighbouring properties, in terms of loss of light, loss of privacy, overbearing and visual impact. Whilst the proposal would result in an increased residential activity from the site, it is not considered that the level of noise and general disturbance generated would be so severe to the amenities of neighbouring properties that warrants a reason for refusal, particularly given its location within an urban area, and located off Manor Road, a primary road.

Access

The proposal would utilise the existing access, albeit with an extended vehicular crossover, and no objections have been raised by the Highways officer in this regard. Concerns relating to parking provision would be a matter for future reserved matters applications when the layout of the proposed dwelling would be fully assessed. However, from the indicative layout it can be concluded that a maximum of 4 spaces could be provided on the drive, although it should be noted that the site is situated close to Grange Hill underground station, this being located approx. 0.1 miles or a 2 minute walk away. So a slightly reduced car parking provision in this instance would be acceptable.

Nonetheless, whilst the parking spaces are indicated on the plans layout is a reserved matter and we are only considering the access to and from the site and the scale (height, width and length) of the proposal.

Epping Forest Special Area of Conservation (SAC)

A significant proportion of the Epping Forest Special Area of Conservation (the EFSAC) lies within the Epping Forest District Council administrative area. The Council has a duty under the Conservation of Habitats and Species Regulations 2017 (as amended) (the Habitats Regulations) to assess whether the development would have an adverse effect on the integrity of the EFSAC. In doing so the assessment is required to be undertaken having considered the development proposal both alone and in combination with other Plans and Projects, including with development proposed within the Epping Forest Local Plan Submission Version (LPSV)

The Council published a Habitats Regulations Assessment in January 2019 (the HRA 2019) to support the examination of the LPSV. The screening stage of the HRA 2019 concluded that there are two Pathways of Impact whereby development within Epping Forest District is likely to result in significant effects on the EFSAC. The Pathways of Impact are effects of urbanisation with a particular focus on disturbance from recreational activities arising from new residents (residential development only) and atmospheric pollution as a result of increased traffic using roads through the EFSAC (all development). Whilst it is noted that the independent Inspector appointed to examine the LPSV, in her letter dated 2 August 2019, raised some concerns regarding the robustness of elements of the methodology underpinning the appropriate assessment of the LPSV, no issues were identified in relating to the screening of the LPSV or the Pathways of Impact identified. Consequently, the Council, as Competent Authority under the Habitats Regulations, is satisfied that the Pathways of Impact to be assessed in relation to this application pertinent to the likely significant effects of development on the EFSAC alone and in-combination with other plans and projects are:

- 1) Recreation activities arising from new residents (recreational pressures); and
- 2) Atmospheric pollution as a result of increased traffic using roads through the EFSAC.

Stage 1: Screening Assessment

This application has been screened in relation to both the recreational pressures and atmospheric pollution Pathways of Impact and concludes as follows:

- 1) The site lies within the Zone of Influence as identified in the Interim Approach to Managing Recreational Pressure on the Epping Forest Special Area of Conservation' (the Interim Approach) adopted by the Council on 18 October 2018 as a material consideration in the determination of planning applications. Consequently, the development would result in a likely significant effect on the integrity of the EFSAC as a result of recreational pressures.
- 2) The development has the potential to result in a net increase in traffic using roads through the EFSAC.

Consequently, the application proposal would result in a likely significant effect on the integrity of the EFSAC in relation to both the recreational pressures and atmospheric pollution Pathways of Impact.

Having undertaken this first stage screening assessment and reached this conclusion there is a requirement to undertake an 'Appropriate Assessment' of the application proposal in relation to both the recreational pressures and atmospheric pollution Pathways of Impact.

Stage 2: 'Appropriate Assessment'

Recreational Pressures

The application proposal has the potential to increase recreational pressures on the EFSAC. However, the Council, through the development of the Interim Approach, has provided a strategic, district wide approach to mitigating recreational pressures on the EFSAC through the securing of financial contributions for access management schemes and monitoring proposals. Consequently, this application can be assessed within the context of the Interim Approach. In doing so the Council has sought to take a proportionate approach to the securing of such financial contributions, and currently only seeks these from proposals for new homes within 3km of the EFSAC, as is the case with this planning application. The applicant has agreed to make a financial contribution in accordance with the Interim Approach. . Consequently, the Council is satisfied that the application proposal would not have an adverse impact on the integrity of the EFSAC subject to the satisfactory completion of a Section 106 planning obligation.

Atmospheric Pollution

The application proposal has the potential to result in a net increase in traffic using roads through the EFSAC. However, the Council, through the development of an Interim Air Pollution Mitigation Strategy (IAPMS), has provided a strategic, district wide approach to mitigating air quality impacts on the EFSAC through the imposition of planning conditions and securing of financial contributions for the implementation of strategic mitigation measures and monitoring activities. Consequently, this application can be assessed within the context of the IAPMS. The applicant has agreed to make a financial contribution in accordance with the IAPMS. In addition, the application will be subject to planning conditions to secure measures as identified in the IAPMS. Consequently, the Council is satisfied that the application proposal would not have an adverse impact on the integrity of the EFSAC subject to the satisfactory completion of a Section 106 planning obligation and the imposition of relevant planning conditions.

Other Considerations

With regards to the standard of accommodation, whilst layout is a reserved matter, from the proposed indicative gross internal area (GIA) the following housing mix could be comfortably accommodated within the proposal;

1. Flat 1 @ 145.2m² located on the ground floor can accommodate a family unit with 2-3 bedrooms, and would also have direct access to its own private amenity space;
2. Flat 2 @ 40.3m² located on the first floor can accommodate a studio flat for a single person;

3. Flat 3 @ 40.1m² located on the first floor can accommodate a studio flat for a single person;
4. Flat 4 @ 38.m² located on the first floor can accommodate a studio flat for a single person;
and
5. Flat 5 @ 51.4m² located on the second floor can accommodate a 1 bed flat for 2 persons.

Flats 2 – 5 would have a shared amenity space to the rear of the site.

Notwithstanding the above, layout is to be fully assessed under a future reserved matters application.

Conclusion

For the reasons set out above having regards to all matters raised, it is recommended that outline planning permission be granted subject to conditions and subject to completion of a S106 Legal Agreement to secure appropriate financial contributions for the management and monitoring of visitors and air quality to the Epping Forest Special Area of Conservation including monitoring fees.
