The Committee concluded that as the only Listed Building feature, a fireplace, was all that survived from the recent fire, and that this was to be retained in the new development, then there would be no harm to historic and architectural interest of the site and the design and appearance of the new building was acceptable.

CONDITIONS

- 1 The works hereby permitted must be begun not later than the expiration of three years, beginning with the date on which the consent was granted.
- 2 Details of the types and colours of the external finishes shall be submitted for approval by the Local Planning Authority in writing prior to the commencement of the development, and the development shall be implemented in accordance with such approved details.

- 4 Before the commencement of the development or of any works on the site, and concurrently with the detailed design plans, a tree survey shall be submitted to the

The Arboricultural Method Statement shall include a tree protection plan to show the areas designated for the protection of trees, shrubs and hedges, hereafter referred to as Protection Zones. Unless otherwise agreed, the Protection Zones will be fenced, in accordance with the British Standard Trees in Relation to Construction-Recommendations (BS.5837:2005) and no access will be permitted for any development operation.

The Arboricultural Method Statement shall include all other relevant details, such as changes of level, methods of demolition and construction, the materials, design and levels of roads, footpaths, parking areas and of foundations, walls and fences. It shall also include the control of potentially harmful operations, such as burning, the storage, handling and mixing of materials, and the movement of people or machinery across the site, where these are within 10m of any designated Protection Zone.

The Arboricultural Method Statement shall indicate the specification and timetable of any tree works, which shall be in accordance with the British Standard Recommendations for Tree Works (BS.3998: 1989).

The Arboricultural Method Statement shall include a scheme for the inspection and supervision of the tree protection measures. The scheme shall be appropriate to the scale and duration of the works and may include details of personnel induction and awareness of arboricultural matters; identification of individual responsibilities and key personnel; a statement of delegated powers; frequency, dates and times of inspections and reporting, and procedures for dealing with variations and incidents.
