4	This is a far more democratic process with both visibility and	Buckhurst Hill
	accountability which we have seen most recently with the London	
	Mayor. A much better approach as the leader is almost anonymous	
	now to the public in this area.	
5	I also feel that the Mayor's Cabinet appointments must be subject	Loughton
	to a 2/3rds majority vote of the whole District Council & that the	
	Mayor may recommend to the District Council the suspension or	
	dismissal of a Cabinet member for misdemeanour, & that the	
	Electorate-especially in the Ward of the Councillor-be informed &	
	given the chance to protest at the suspension/dismissal.

52	Its about time democracy became real by giving residents the	Nazeing

	cabinet. Why should a major or leader be given the automatic right	
	to decide who runs the council? Until things are fairer and residents

7	The cost of an elected mayor cannot be justified in these times. Also with a leader and cabinet there is a change every year, but with an elected mayor we have one for a fixed period and this is not good.	North Weald.
8	Regret there is no option to discontinue the cabinet system, but feel on balance the existing leader and cabinet system is more accountable to the public/electorate. I would not want to see money wasted changing to a mayoral system that has few discernible advantages.	Ongar
9	In a relatively geographically and demographically scattered area such as Epping Forest district, it is important for electors to maintain a close relationship with their local ward councillors who can respond to often very local needs. Moving to a Mayor and Cabinet system removes a great deal of influence away from ward councillors to a smaller group of individuals who may not appreciate so well the fine grain of residents' concerns. I am also concerned that focusing political attention on a single mayoral figure may result in Epping doing a "Doncaster" where an inexperienced figure can win election on a wave of short-term populism or revulsion of national political issues, doing damage to the area through that inexperience and inability to use the political and administrative tools at their disposal. The current system, despite its flaws, works best for the longer-term interests of residents, businesses and the area.	Epping

16	Electing a mayor may result in someone who does not have the support of the majority party which would cause friction and lead to difficulties in decision making. Whatever ones views are on the majority party, since they represent the views of most of the electorate following a democratic vote their policy should in the main prevail.	Theydon Bois

If the majority on the council felt the leader was not up to the job, they could change her. An elected mayor would have too much power, ipping the balance away from the council chamber. It also leads to the dominance of personality politics, which I don't think is helpful in politics and detracts from real issues. Experience suggests that lines of accountability largely depend on the attitude of the mayor rather than the system itself. Hence, Hartlepool's mayor is widely popular and praised as an effective leader, whereas Doncaster has had a miserable experience with two successive mayors who do not have the confidence of the council chamber leading to a state of conflict that prevents business running smoothly. 49	I read in the local paper that you are looking for views on the idea of electing a mayor - don't even go there. A complete waste of time and money. the existing system we have works well, what we do not need is another layer of local government as per Boris or the Hartlepool monkey.

52	It is unacceptable to set a deadline of 16th Nov 2010 when Grant Shapps MP states that the council must resolve by 31st December 2010. This is not allowing residents full consultation time. I believe that a deadline date of late December would be more appropriate.	Buckhurst Hill
