Members were particularly concerned about the quality and form of the proposed development and the cumulative impact of the existing demand for on-street parking and additional demand for on-street parking likely to be generated by the development. The design of the proposed building was found to be particularly poor with little interest and a lack of respect for the character of the locality. Its bulk and siting was found to be harmful to the amenities of the occupants of neighbouring properties. Having regard to the shortcomings of the proposal and the consequences for its layout if it were revised to accord with the 2009 parking standards, Members found it to be an unsympathetic over-development of the site.

Concern was also expressed about the lack of information submitted with the application in respect of the exposure of the site to noise. Members took the view that this matter could not reasonably be dealt with by a planning condition since the form and layout of the proposal might be materially affected by the steps necessary to comply with such a condition.

**REASONS FOR REFUSAL**

- 1 By reason of its bulk and flat roofed design the proposed block of flats would have a poor appearance that fails to respect its setting and the character and appearance of the locality, contrary to policies CP2(iv), CP3 (v), CP7 and DBE1 of the Epping Forest District Local Plan and Alterations.
- 2 By reason of its height and siting adjacent to the rear garden boundaries of neighbouring dwellinghouses in Walnut Way together with the difference in levels between the site and neighbouring gardens, the proposed block of flats would appear excessively overbearing when seen from adjacent residential properties to the detriment of the amenities enjoyed by their occupants. Accordingly the proposed development is contrary to policies CP7 and DBE9 of the Epping Forest District Local Plan and Alterations.

- 3 By reason of its inadequate provision of off-street parking spaces the proposed development fails to comply with the September 2009 Parking Standards. As a consequence it is likely to exacerbate a high demand for on-street parking in the locality to the detriment of its character. Accordingly the proposed development is contrary to policies CP2(iv), CP3 (v), CP7 and ST6 of the Epping Forest District Local Plan and Alterations.
- 4 As demonstrated by its poor design, over-dominant appearance and lack of off-street parking provision the proposal would be an unsympathetic over-development of the site to the detriment of the character and visual amenities of the locality contrary to policies CP2(iv), CP3 (v), CP7 and DBE1 of the Epping Forest District Local Plan and Alterations.
- 5 The proposal is for a noise sensitive development. By reason of its siting in very close proximity to a railway the proposed flats and associated private amenity space would be exposed to high levels of noise. The failure to submit a noise survey for the site sufficient to establish which noise exposure category it falls within prevents proper assessment of whether it is possible to mitigate the adverse impact of noise on the living conditions of the occupants of the flats and whether the development can be carried out in the form proposed. As a consequence it is not appropriate to deal with this matter by the imposition of a planning condition and therefore the development is contrary to policy RP5A of the Epping Forest District Local Plan and Alterations.
